

Enhance coding efficiency and productivity

Ensure accurate reimbursement and minimize compliance risk.

To keep pace with today's complex and constantly evolving compliance requirements, your coding professionals need an easy-to-understand coding application that serves your entire organization.

Enabling staff to more accurately and efficiently assign codes not only helps ensure more accurate reimbursement, but also helps reduce overall costs while accelerating the revenue cycle.

Multiple facilities, a single coding interface

Nuance Clintegrity Facility Coding empowers coding staff by providing critical clinical, financial, and regulatory information essential for complete and accurate reimbursement.

This single, unified platform offers transparent, centralized encounter management across your facilities. This helps ensure data and coding consistency between physician and facility encounters, even when using separate billing systems.

Using an intuitive, web-native workflow, Nuance Clintegrity Facility Coding efficiently streamlines the coding process and dramatically improves the ability of Health Information Management (HIM) staff to code, group, and apply target edits using single interface, from anywhere—at any time.

Proven, knowledge-based approach

Nuance Clintegrity Facility Coding maintains and augments your coders' ability to identify and utilize codes for Diagnosis Related Groups (DRGs) and Ambulatory Payment Classifications (APCs) reimbursement. This helps ensure that staff are using the same coding guidelines to identify noncompliant coding encounters and reduce errors that can lead to costly Recovery Audit Contractor (RAC) and other audits.

By integrating hospital and physician coding, reimbursement, and compliance tools, organizations can achieve enterprise-wide data integrity for better consistency and accuracy.

Key benefits

- **Improves coding compliance**
Enables consistent coding assignment and application of coding rules and guidelines for ICD-9, ICD-10, CPT, and HCPCS codes.
 - **Maximizes productivity**
Allows simultaneous encoding and grouping, dual-grouping capability at the encounter level, and quick and easy access to industry-accepted coding references.
 - **Increases coding accuracy and appropriate reimbursement**
Provides automated tools for fast and accurate code assignment from either ICD-9 or ICD-10 in the same application.
 - **Provides continuous monitoring and improvement of coding practice**
Uses detailed reporting capabilities to identify coding trends, outcomes, and improvement opportunities.
-

Reliable, knowledge-based approach

Simple workflow

Nuance Clintegrity Facility Coding offers a single screen with easily accessible code books, references, and edits. Users can efficiently assign and group an encounter using multiple groupers and instantly model how these factors impact reimbursement.

Built-in references and Smartips

Users have quick and easy access to multiple fully integrated and searchable references built into the coding workflow. Nuance's expert Smartips offer thousands of standard coding guidelines that can be customized to include notes and tips viewable to a coder during the coding process.

Data automation for reduced errors

Comprehensive edits immediately identify potentially incomplete and noncompliant coded records with extensive and customizable code edits and rules.

Enterprise reporting

Monitors and manages key coding metrics and performance indicators with standard and customizable report options.

“Nuance helps you be a better coder, because you’re not relying on a decision tree; you’re relying on your coding knowledge.”

Kati Beisel, RHIA, CCS, CCDS,
System Director of Medical Coding
INTEGRIS Health, Oklahoma City, OK

Nuance Clintegrity Coding Solutions

Nuance Clintegrity Facility Coding is part of the award-winning Nuance Clintegrity Coding Solutions, a web-based, enterprise-wide suite of products designed to improve coder productivity and maintain the highest levels of accuracy and compliance. These solutions efficiently manage and monitor the compliance coding challenges that can put a health system at risk and delay and reduce reimbursements. Nuance Clintegrity Coding Solutions brings together all the tools needed to completely and accurately review, analyze, code, and audit inpatient and outpatient encounters, manage the workflow better, and enhance coder productivity.

To learn how Nuance Clintegrity Facility Coding can help you achieve predictable reimbursement, please contact us at 1-877-805-5902 or visit nuance.com/healthcare.

About Nuance Communications, Inc.

Nuance Communications, Inc. is a leading provider of voice and language solutions for businesses and consumers around the world. Its technologies, applications and services make the user experience more compelling by transforming the way people interact with devices and systems. Every day, millions of users and thousands of businesses experience Nuance's proven applications. For more information, visit www.nuance.com/healthcare or call 1-877-805-5902.
