

Speech enable Altera Digital Health Sunrise with Dragon Medical One

Making it faster and easier for clinicians to update the electronic patient record (EPR).

Nuance partners with Altera Digital Health to enable more complete, accurate, and timely documentation within the electronic patient record (EPR)— improving patient care and increasing staff satisfaction. Our AI-powered speech recognition solution Dragon Medical One seamlessly works with Altera Digital Health Sunrise and delivers 99% accuracy from the start with NO voice profile training required.

Dragon Medical One is a cloud-based solution, providing doctors, nurses and allied health professionals with a single voice profile that can be accessed on different devices in different locations. Individual user speech profiles, including custom vocabularies and autotext templates, are sharable across devices and apps. With Dragon Medical One, clinicians can document directly within the EPR or generate voice-driven content outside of the patient record.

Use voice commands to navigate Altera Digital Health Sunrise more quickly and easily:

- Dictate at the cursor within Altera Digital Health Sunrise modules and mobile applications
- Dictate into the EPR with a mobile device (an alternative to using a tethered microphone) using the Nuance PowerMic mobile application which is supported on iOS and Android platforms

Strategic collaboration and joint development

Nuance and Altera Digital Health have been engaged in joint development and innovation projects so we can deliver a seamless user experience:

- Joint roadmap and strategic planning enable future development of AI-supported workflows
- Strategic partnership aligned with Altera Digital Health growth objectives

WHY ALTERA DIGITAL HEALTH CLIENTS CHOOSE NUANCE

- **AI-powered** speech recognition
 - **Clinical approach** and content backed by 25 years of expertise
 - **Mobile effectiveness**
 - **Improved costs**, better outcomes, and better experience
-

Maximising the EPR value

Integrations between Nuance Healthcare Solutions and Altera Digital Health Solutions allow clinicians to use conversational user interfaces to create effective and comprehensive clinical documentation—while maximising the value healthcare organisations receive from their EPR.

Dragon Medical One in Altera Digital Health Sunrise offers,

- **Cloud-based** and **secure speech**-enabled documentation for clinicians on the go, accessible through any browser with no additional software to install or usernames/passwords to remember
- **Full support** for PowerMic Mobile (Nuance mobile app. supported by iOS and Android platforms) hosted on Microsoft Azure in the United Kingdom, an ISO 27001 certified hosting infrastructure
- **Speech-to-text** capabilities outside Altera Digital Health Sunrise, such as in Microsoft® Office.
