

Nuance® Dragon® Anywhere Group

Enterprise-ready, professional dictation on your mobile device.

Get documents done on the road

Busy professionals who are often on the road want to maximize on-the-go productivity so they can focus more time on clients and other strategic priorities that impact the bottom line. While documenting client interactions, writing correspondence and capturing detailed notes are important parts of the job, these tasks require professionals to spend long hours typing at their desktop to keep up with paperwork.

These professionals typically carry some kind of mobile device with them to get work done and stay connected on the road. Some may still be scribbling down notes by hand and others may dictate into their mobile devices while information is fresh in their minds, to transcribe the recordings later—either on their own or using an administrator or outside service. These approaches are time-consuming and still require careful document proofreading and extensive, back-and-forth editing to ensure high quality and accuracy.

By using their mobile devices to dictate detailed notes and documents of any length and immediately edit and format as needed, busy professionals can

save steps and speed up document turnaround. To realize these productivity gains, however, they need powerful continuous dictation capabilities that can accurately recognize specific industry terms and voice shortcuts as well as the ability to seamlessly sync their customizations across all their Dragon Group products to work more efficiently from any location.

The mobile dictation solution for enterprises

Dragon Anywhere Group for iOS and Android offers an enterprise-ready solution to enable professional-grade, cloud-based dictation for busy mobile professionals who want to work faster and smarter. Dictate and edit documents of any length quickly and accurately, and customize words and auto-texts that seamlessly sync with all your Dragon Group products. Use the Nuance Management Center (NMC) to set up and centrally manage accounts, words and auto-texts for your employees. As an option, Dragon Anywhere Group's industry-leading, cloud-based speech recognition can be integrated into your own mobile apps and platforms, mobilizing your workforce while keeping your preferred interface and existing workflow with backend systems

Key features and benefits

- Create and edit documents with enterprise-ready, professional-grade, cloud-based mobile dictation
- High recognition accuracy that continually adapts to you
- Customize words to include unique and business-specific terminology
- Quickly insert custom auto-texts
- Sync customizations with Dragon Group products and devices
- Send and manage dictated text
- Quick to set up and centrally maintain for multiple professionals
- Flexibility to integrate into your own mobile apps and platforms, to keep your preferred application interface and existing workflow
- Save with volume discount, based on lifetime cumulative purchases

System requirements

- iOS 8.1+ (iPad 3+, iPhone 5+ or iPad Mini 1+) or Android 4.4+ phones and tablets
- Active WiFi or cellular connection

such as record or case management systems. With a flexible and easy to maintain solution enabling more productivity on the road, you and your employees can focus more time on clients, customers and core business tasks.

Features and benefits

Enterprise-ready, professional-grade, cloud-based dictation on mobile devices

Dictate continuously without time or length limits to create, edit, format, navigate and select text—all by voice. Create entire documents on your mobile device simply by talking and see the results of your dictation or corrections immediately.

Great for mobile professionals or field worker personnel often on the road, who need to take detailed notes or dictate documentation about their client or customer interactions, and want to be more productive anywhere their job takes them.

High recognition accuracy

Dragon Anywhere provides powerful features like automatic accent detection to deliver accurate recognition results right out of the gate—with no training required. And because you set up your own personal profile that continually adapts to your voice, words and corrections, you enjoy a personalized experience that gets even more accurate over time.

Plus, because speech recognition occurs in the cloud, your experience improves over time—without requiring that you update the client.

Edit, format, select and navigate your text

Inline dictation commands enable

fast correction, formatting, navigation and even photo insertion. Command examples include:

- Text selection: Select <text>, Select <text> to <text>, Select All
- Correction: Scratch That, Undo That, Insert Before, Resume With, Correct <text>
- Formatting: Bold That, Italicize That, Underline That, Set text color to <color>
- Navigation: Go to Beginning/End, New Line, New Paragraph, Next Input Field
- Photos: Choose/Take a photo

Users can easily mix and match voice and keyboard interaction, depending on the most convenient mode, for flexibility and convenience.

Customize words

Dragon Anywhere Group allows you to customize words for accurate recognition of specific business terminology, company or industry acronyms, proper nouns or personal preferences every time. You can add words to your vocabulary at any time to achieve continually better results. These words are automatically synchronized to your account so they're available on any of your Dragon Anywhere Group devices or on your Dragon Group desktop.

Shortcut steps with voice commands

Define simple voice commands to short-cut repetitive processes and improve your mobile productivity. For example, you can define custom text (also known as "auto-text") or create custom forms or templates to speed and simplify document creation.

- An auto-text allows you to store

a frequently-used text passage to define a simple voice command for automatically inserting that text within a document. For example, you can use auto-text to insert your signature and contact information in a letter, a bulleted list of items into a quote, or a standard clause in a legal document just by saying a simple command.

- A custom form enables you to fill out frequently-used forms quickly and easily by bringing up a stored form and dictating to fill in the information. You can use voice commands such as "Next/previous field" to navigate between the fields for even faster form filling.

Synchronize with your desktop and across devices

Custom words and auto-texts are automatically synchronized with your Dragon Group desktop next time you log into the network so you can work seamlessly by voice anywhere you go. Because you can create these customizations from Dragon Anywhere Group or from your Dragon desktop, you don't have to worry about which device they're on. Even if you have multiple mobile devices, you can dictate on any one of them provided you use your personal account to automatically sync all customizations. With Nuance Management Center (NMC), you can also easily sync up these customizations with colleagues in your organization.

Central management with Nuance Management Center (NMC)

Dragon Anywhere Group purchases automatically include NMC administration capabilities for managing these subscriptions. Easily deploy and maintain Dragon

Anywhere Group for multiple professionals in your organization, including centrally managing subscriptions, tracking usage, and automatically sharing customizations across devices and with colleagues in your organization. With the same NMC interface used to manage all Dragon Group products at the user, group, site or corporate-wide levels, save IT time and money to deploy, configure, maintain, manage, update, and support Dragon Group products in the enterprise, while making it seamless for your users.

Easy document management

Once your dictation is ready to be shared with your other devices or your colleagues, you can use your voice to send the document by email or save it to a cloud storage service. You can also import existing documents for further editing on your mobile device. You can:

- Email dictated text: Send it in the body of an email or as an email attachment
- Share documents to cloud storage: Export dictated text as a .docx, .rtf, or .rtfd (iOS only) document
- Import documents from cloud storage: Import .docx, .txt, .htm, .rtf and .rtfd (iOS only) files

- Open in Word: Open your dictation in Word (if the Microsoft Word app is installed) and then save your document using Word
- Save your dictation to Evernote as a new note
- Copy and paste dictated text via OS functions

Easy to use

Dragon Anywhere Group provides an intuitive user experience and helpful resources to get you up and running quickly on your mobile device:

- Easy-to-use interface
- Comprehensive help and videos
- Audio signal quality indicator that provides immediate feedback
- Interface and command set similar to those of Dragon Group desktop

Flexibility with multi-platform integration

As an option, Dragon Anywhere Group's industry-leading, cloud-based speech recognition can be integrated into your own mobile apps and platforms, mobilizing your workforce while keeping your preferred interface and existing workflow with backend systems such as record or case management systems. Easily add audio management, microphone control and dictation commands

with pre-packaged frameworks or develop more advanced features to suit your use cases. Recognized text is delivered to your apps so you can format and extract it for processing by backend systems. With flexible options, the Dragon Anywhere Group solution can help meet your enterprise workflow needs to enable mobile dictation productivity in your organization.

Volume discounts

As part of our open license program (OLP), benefit with multiple subscription purchases of Dragon Anywhere Group for your organization and move into higher discount tiers quickly, based on lifetime cumulative purchases.
