

Un-installation

1. Select Add/Remove Programs from the Control Panel. Under Vista, select Programs and Features from the Control Panel.
2. Select Nuance PDF Professional 5.0.
3. Click Remove to uninstall the program or Change to auto-repair it.

This removes all three components of PDF Converter Professional.

A de-activation step is performed at the start of uninstallation, allowing you to reinstall the program later without re-activation problems. De-activation requires web access.
