

START TO DICTATE

TURN ON THE MICROPHONE

Before you can dictate, you need to turn on the microphone. You turn on the microphone by doing one of the following:

- Clicking the microphone icon on the DragonBar.

You can click this icon again to turn it off.

- Pressing the plus (+) key on the numeric keypad to turn the microphone on, and then pressing it again to turn the microphone off.
- Clicking the microphone icon in the Windows® system tray.

START TO DICTATE

To begin dictating, start a word processor (such as Microsoft® Word™) and begin a new document. Make sure that your cursor is located within the document and simply start talking.

As you talk, text will display in the Results box while Dragon NaturallySpeaking determines what you said. The Results box is a small yellow window that appears on-screen as you dictate. For example, if you say "talking to a computer," the program will display "talking to a computer" in the Results box and then write the words "talking to a computer" into your application:

talking to a computer

GETTING MORE INFORMATION

The Dragon NaturallySpeaking includes a User Manual and extensive online help. To access the online help, click the Help menu on the DragonBar and choose Help Topics. Alternately, you can say "Give Me Help."

GETTING SUPPORT

For answers to many Dragon NaturallySpeaking technical support questions, additional support offerings, including an online Knowledge Base, downloadable User Guides and Hardware compatibility, visit:

RECOGNITION
SOFTWARE**

Support is available online by visiting: www.nuance.com/NaturallySpeaking/support

INSTALL THE SOFTWARE AND CREATE A USER PROFILE

INSTALL DRAGON NATURALLYSPEAKING

- 1) If you're running a virus checker, turn it off before installing Dragon NaturallySpeaking.
- 2) Put the Dragon NaturallySpeaking DVD into your DVD drive and follow the on-screen prompts.
- 3) When prompted, enter the serial number that came with your software.
- 4) Next, choose a Setup Type. We recommend **"Typical/Complete."** "Typical/Complete" ensures that all the proper files are installed on your computer.

Click **Next** to continue.

- 5) When prompted to enable the QuickStart option, click **Next**. You can enable the QuickStart option after you become more familiar with the product.
- 6) Continue to click **Next**, taking all the recommended options.
- 7) Click **Finish** to complete the installation.

PLUG IN YOUR MICROPHONE

Before you can use Dragon NaturallySpeaking, you will need to plug in your microphone.

STARTING DRAGON NATURALLYSPEAKING

To start the program, double-click the Dragon NaturallySpeaking desktop icon.

ACTIVATE DRAGON NATURALLYSPEAKING

The first time you start the product, you will be prompted to activate your software. It is important to activate the software. If you don't, the program will stop working after you start it five times.

When prompted, first click **"Activate Now"** and then **"Activate Automatically."** You must be connected to the internet to activate the product.

For more information on activation, please see:
<http://support.nuance.com/productactivation>

CREATING A USER PROFILE WITH THE NEW USER WIZARD

The New User Wizard starts automatically the first time you start Dragon NaturallySpeaking. To create a user profile:

STEP 1: Enter your user information

Give your user a unique name and select your microphone type from the drop-down list:

For your initial training, select **"None"** and click **Next**. You can perform additional training after you become more familiar with the product.

STEP 2: Check the microphone and train the user

The New User Wizard describes how to set up your microphone. When you click **Next**, you will be prompted to check your volume and sound quality. Make sure to read exactly what the program displays. Click **Next** to continue.

When the New User Wizard asks if you want to **"Adapt Dragon NaturallySpeaking to your writing style,"** select **"Skip this step"** and click **Next**.

STEP 3: Setup Accuracy Tuning

The New User Wizard prompts you to periodically run Accuracy Tuning. Accuracy Tuning will make your dictation more accurate. To schedule a time for Accuracy Tuning to run, click **Configure**.

To get more information on Accuracy Tuning and Data Collection, click the **Help** button.

STEP 4: You are ready to dictate

The New User Wizard will ask whether you'd like to start the Tutorial, see what's new in the product, or begin dictating. We recommend that first time users view the tutorial.

Once you've made your choice, click **Finish**.

Once you click Finish, the DragonBar will appear on the top of your screen. You can now dictate into almost any Windows®-based program on your computer.
