**Don't Just Convert Documents, Transform Them With OmniPage Professional 18**

Today, the continued use of paper slows organizations down and frequently leads to “knowledge re-creation.” Not only does this waste workers’ time—

as they’re forced to re-create information from existing paper forms or search for misplaced documents—but it is also a drain on overall productivity and profitability.

The question remains: “How can you get the document into the format you want without having to do extensive re-typing or re-editing?”

Now the answer is OmniPage® Professional 18. This innovative solution lets you convert paper, PDF files, and forms at lightning speed into documents you can edit on your PC or archive in a document repository. Amazing accuracy, combined with batch processing and comprehensive network features, make it the perfect choice for organizations of all kinds.

### MAXIMIZE PRODUCTIVITY WITH THE eDISCOVERY ASSISTANT FOR SEARCHABLE PDF

PDF files are everywhere and can come from a variety of sources. They can include scanned pages, embedded images, and other types of information. Yet, many of these elements don't include searchable text.

The new eDiscovery Assistant for searchable PDF is a revolution in safely converting a single PDF or batches of PDFs of all types into completely searchable documents. Now you don't have to open PDF files individually, or use an OCR process that may unintentionally wipe out valuable information.

### ACCESS AND CONVERT DOCUMENTS IN THE CLOUD

Storing, sharing, and archiving documents using cloud storage services is a fast and convenient option today. OmniPage Professional is designed to easily connect to a variety of cloud storage and online document websites. Now you can access and convert documents stored in Windows® Live SkyDrive, GoogleDocs, Evernote, Dropbox, and many other storage options. You can even open documents directly from one cloud service, convert them, and store them in a different cloud service—all in one convenient step.

### With OmniPage Professional, you can:

- Take advantage of superior word accuracy to re-create documents quickly
- Maintain formatting so a converted document looks exactly like the original
- Make documents completely searchable while preserving existing text
- Batch convert paper and PDF files into documents you can edit and archive
- Automate the collection and conversion of forms and data
- Connect with leading cloud storage services and convert documents in them
- Redact and highlight automatically with workflows
