

## What Are OmniPage 17 Customers Saying?

"I am writing to provide my thoughts on OmniPage 17. I have used versions 12, 15, and currently use 16. The first thing I noticed was the improved load speed. This is important to me because I use OmniPage on a notebook computer that doesn't possess a blazing fast CPU. The interface seems much cleaner, less cluttered. I use Word 2007 daily and the Word 2007 integration is simpler than OmniPage 16. I fell in love with digital camera OCR with version 16 and continued to be impressed with OmniPage 17. I oversee 19 regional satellite offices and move to a different one each week. Some of the offices don't have an easily accessible scanner. In that case, I pull out my digital camera and snap photos of several documents, transfer the JPEG images to the computer, and convert them with OmniPage. The results are consistently accurate."

— Joel A. Harper

"Our experience with OmniPage 17 has been very positive. It works very well with our new scanner and our results have been excellent. The scanning is fast and extremely accurate. The program flawlessly scans multiple page documents with ease. We like being able to output directly to Office 2007. The work we do with OmniPage 17 is so seamless we hardly realize we are scanning hard copy."

— Jess Keller, *Creative Director*. Five Thousand Forms, Inc.

"I have been using OmniPage 15 for work. I find that OmniPage 17 is both faster and more accurate. The difference between 15 and 17 is more like night and day. I like the layout better and OmniPage 17 is more logical in its operation. What impressed me the most is how well it handles the special Norwegian letters like æ, ø and å. I also like how much faster it loads, and the e-mail options. I am using both PDF Converter Professional 5 and PaperPort 11 and find they work very well together. You've made a great improvement from OmniPage 15 to 17."

— Olav H. Pedersen (Norway)

"I have been using OmniPage Professional 16 and I immediately noticed that OmniPage 17 is both faster and more accurate. The new Hyper-Binary Conversion consistently delivers fewer errors than OmniPage 16 on my scanned documents. This saves me considerable time as I am often scanning documents longer than 50 pages long. The improvement is both noticeable and greatly appreciated. Aside from the improved speed and accuracy I am finding the new Easy Loader has become my favorite new feature."

— Anne Wold

"Best Ever! OmniPage 17 took documents with complex graphics and tables and I only had to verify two areas of a 20 page document conversion. Moving between scanned images and real text is wonderful. Workflow interface is easy and intuitive for even a novice. I had my 16 year old son convert a school document and he did it without any issues. Accuracy is phenomenal."

— Richard Koehl

"I received my OmniPage SE as part of a bundle with my scanner. I thought it was all I needed. I have found that OmniPage 17 is significantly more accurate and it has saved me a lot of time. Before OmniPage 17 I had to correct a lot of words and text. I have used OmniPage a lot in connection to big cases where I had to translate the files from German paper documents into English. It all starts with scanning the German text so I can run the OCR results through translation software and then I edit the results. Accuracy is critically important to get the proper translation and for that reason I found it much faster to work with OmniPage 17. For other projects I find that the layout accuracy is also much better. I highly recommend that people upgrade from the included software with a scanner to OmniPage 17."

— Søren Hermansen

"I want to take a moment and share my thoughts on OmniPage 17 for I am thoroughly impressed. It is a good fit for the way I need to use it and the features have worked flawlessly. Perhaps I should have upgraded to OmniPage 16 but OmniPage 15 didn't excite me and I didn't think OmniPage 16 would either. OmniPage 17 is superior in every way I have used it so far. It is much faster loading the program and performing OCR.

Moving items directly from OmniPage to SharePoint is great. The One-Click Direct OCR buttons for Microsoft Office was a surprise. They have worked perfectly and I use this feature a lot. This one feature is a real time saver for me...The accuracy of the document layout is far superior to OmniPage 15. I am able to move data from Word to PDF and PDF to Word while keeping the layout of the document. It's just terrific. I am really pleased with the OmniPage 17 and glad I took the opportunity to upgrade."

— Thomas Hackett
