## PAPERPORT PSP DESKTOP FOR HP

### Personalized Scanning Platform (PSP), Document Management and Conversion Software for Select Hewlett-Packard Multi-function Printers

PaperPort PSP Desktop for HP leverages award-winning PaperPort PSP technology from Nuance Communications, Inc to allow you to customize the HP MFP scanning menus directly from your desktop for the easiest and most powerful document experience ever. Send documents back to your computer to combine with other documents, add comments, password protect them, and fill-in scanned forms. Manage, search, convert, secure, and share your scanned documents with PaperPort PSP Desktop for HP.

PaperPort PSP Desktop for HP is a suite of software that works seamlessly together to connect the HP MFP to you, your co-workers and even centralized document management systems at the push of a button. It's easy to use because you control the scanning menus with direct access to the networked HP MFP from your own desktop. PaperPort PSP Desktop for HP also includes Better PDF for Business – the most comprehensive set of essential PDF tools to create, convert, and edit PDF files at a fraction of the cost of other solutions.

Get the ultimate productivity from your HP MFP by simplifying document sharing and archiving. PaperPort PSP Desktop for HP software is the only solution that delivers the convenience of advanced scanning capabilities, the productivity of OCR document conversion, the efficiency of desktop document management, and the power of a complete PDF document solution.

#### PERSONALIZED SCANNING

Step up to the HP MFP, login and the panel changes to reveal your personal scanning preferences and destinations. Press the scan button and documents are delivered directly to your computer or other specified destinations.

- Browse only the most commonly used folders on your computer to select your scan destination – documents are sent in the format you specify directly where you want them to go.
- The PaperPort PSP Desktop becomes the user-friendly on-ramp to send your documents to popular Document Management Systems.

#### CREATE PDF

- Scan or create industry standard PDF files from applications that are 100% compatible with, but do not require, Adobe® Acrobat®.
- Create Searchable PDF documents so you can search for text inside your scanned documents from any popular search utility with an indexing service.
- Create secure PDF documents from your scans and other digital files by applying password protection and digital signatures.

#### CONVERT & EDIT

- Eliminate frustrating, unproductive re-typing by turning your un-editable scanned documents into fully formatted Microsoft® Word, Excel, or Corel® WordPerfect files directly from the HP MFP or as needed at your computer.
- Add notes, annotations, stamps, and watermarks to your PDF files.
- Create fillable forms from scanned forms or static PDF forms.

#### SUPPORTED HP MFP DEVICES

- HP LaserJet M3035
- HP LaserJet M4345
- HP LaserJet M5035

## TOP BENEFITS

### 1. Save Space and Money

Reduce expenses involved with filing, copying, finding and storing paper documents. You can eliminate the storage of old archived paper documents by scanning and managing them with PaperPort PSP Desktop for HP.

### 2. Scanned Documents Delivered Fast

Quickly get documents where you need them – By putting your own computer folders on the MFP display panel the PaperPort PSP Desktop solution cuts up to 11 steps from the traditional scanning process.

### 3. Get More Organized

Once paper documents are scanned and filed using PaperPort PSP Desktop they will never be lost. PaperPort PSP Desktop goes far beyond basic scanning and helps you get more organized by viewing, managing, enhancing, blending, sharing, and printing over 150 document and popular photo formats.

### 4. Edit PDF Files Directly

Edit, annotate, correct typos, create fillable forms and even touch up objects directly within PDF files. PDF page thumbnails and assembly tools allow you to easily manipulate pages in a PDF document to rearrange, add or delete pages with drag & drop ease.

### 5. Save Time and Effort with Unmatched OCR Accuracy

The PaperPort PSP Desktop uses technology from OmniPage Professional, the world's best selling OCR software, to deliver converted documents that look just like the original and eliminates re-typing of paper documents

Nuance productivity applications have won over 300 major industry awards.

## PAPERPORT PSP DESKTOP COMPONENTS:

### PaperPort PSP Server

A server based module providing integration and communication between select HP MFP devices and any client computer to personalize the scanning menus on the HP MFP.

### PaperPort Professional 11

PaperPort Professional 11 with Desktop Delivery PSP is the desktop application that is installed on the individual client computers wishing to customize and connect to a networked HP MFP. PaperPort acts as the main application through which all the other PaperPort PSP Desktop software is connected.

### OmniPage Professional 15

OmniPage Professional 15 allows business professionals to achieve new levels of productivity by eliminating the manual re-typing of documents and provides the core OCR technology used by the PaperPort PSP Desktop solution. Precision OCR analysis and layout detection quickly turn scanned documents into over 30 different PC application formats for editing, searching and sharing.

### PDF Converter Professional 4

PDF Converter Professional delivers on the promise of "Better PDF for Business" by combining the power of PDF creation, the flexibility of PDF editing, and the versatility of PDF conversion into one easy-to-use, affordable application.

Languages available: English, French, Spanish, German, Italian, Brazilian Portuguese.

- **Server Components (available for download from Microsoft):**
  - Microsoft® Internet Information Services (IIS) 5.0, 5.1, or 6.0 installed with "World Wide Web Services" and "FTP services"
  - ASP.NET
- **Microsoft® .NET Framework version 2.0.** (required for PSP Admin)
- **Server Hardware:**
  - A computer with an Intel® Pentium® or compatible higher processor
  - 256MB of memory (RAM), 512MB recommended
  - 30MB of free hard disk space for application files plus 5MB working space during installation
- **Monitor:**
  - SVGA monitor with 256 colors, but preferably 16-bit color (called High Color in Windows 2000 and Medium Color in XP and Vista) and 800 x 600 pixel resolution
  - Windows-compatible pointing device
  - CD-ROM drive for installation

## CLIENT SYSTEM REQUIREMENTS

- **Operating Systems:**
  - Microsoft® Windows® Vista, Microsoft® Windows® XP (Service Pack 2), or Microsoft® Windows® 2000 (Server Pack 4).
- **Client Hardware:**
  - A computer with an Intel® Pentium® or higher processor.
  - 256MB of memory (RAM), 512MB recommended
  - 1GB of free hard disk space to install all applications
- **Monitor:**
  - SVGA monitor with 256 colors, but preferably 16-bit color (called High Color in Windows 2000 and Medium Color in XP and Vista) and 800 x 600 pixel resolution
  - Windows-compatible pointing device
  - CD-ROM drive for installation
  - Microsoft Internet Explorer 6.0 or above.
- **Additional Requirements:**
  - 30MB of free hard disk space for application files plus 5MB working space during installation
  - SVGA monitor with 256 colors, but preferably 16-bit color (called High Color in Windows 2000 and Medium Color in XP and Vista) and 800 x 600 pixel resolution
  - Windows-compatible pointing device
  - CD-ROM drive for installation
