Whether you want to make paper digital, convert QuarkXPress® files to Word, or create batches of PDF documents, OmniPage Professional 15 is up to the task with superior speed and accuracy. Powerful new OCR engines improve accuracy by 25% and dramatically reduce proofreading time to boost your productivity. ExactWord output makes the editing process smoother than ever before with perfectly formatted layouts that flow properly from column-to-column and page-to-page. Our IntelliTrain™ proofing system “learns” your editing style by recording previous corrections to generate better OCR results in each successive document. Spend less time “cleaning up” scanned documents with SET (Scanner Enhancement Technology™) tools and focus on more important tasks.

MAKE PAPER FORMS DIGITAL

Turn paper forms into electronic forms. Electronic forms are easier to distribute, fill and process than paper forms. The challenge has always been getting existing paper forms into an electronic format. The new Form Converter feature turns scanned, paper forms into editable electronic PDF, WordML, or Microsoft® InfoPath® forms automatically. In short, we've merged the best of our award winning OmniForm® product into this best ever OmniPage.
