NUANCE

Drive adoption of Allscripts Sunrise with Dragon Medical One

Dragon Medical One, integrated within Allscripts, makes it faster and easier for clinicians to update the EPR.

Nuance partners with Allscripts to enable more complete, accurate, and timely documentation within the electronic patient record (EPR)— improving patient care and increasing staff satisfaction. Our AI-powered speech recognition solution Dragon Medical One seamlessly integrates into Allscripts Sunrise and delivers 99% accuracy from the start with NO voice profile training required.

Dragon Medical One is a cloud-based solution, providing doctors, nurses and allied health professionals with a single voice profile that can be accessed on different devices in different locations. Individual user speech profiles, including custom vocabularies and autotext templates, are sharable across devices and apps. With Dragon Medical One, clinicians can document directly within the EPR or generate voice-driven content outside of the patient record.

Use voice commands to navigate Allscripts Sunrise more quickly and easily:

— Dictate at the cursor within Allscripts Sunrise modules and mobile applications

— Dictate into the EPR with a mobile device (an alternative to using a tethered microphone) using the Nuance PowerMic mobile application which is supported on iOS and Android platforms

Strategic collaboration and joint development
Nuance and Allscripts have been engaged in joint development and innovation projects so we can deliver a seamless user experience:

— Joint roadmap and strategic planning enable future development of AI-supported workflows

— Strategic partnership aligned with Allscripts' growth objectives

4 out of 5 healthcare organisations worldwide that use Allscripts use Nuance
> 20,000 clinicians
> 500 institutions

WHY ALLSCRIPTS CLIENTS CHOOSE NUANCE

— **AI-powered** speech recognition for Allscripts

— **Clinical approach** and content backed by 25 years of expertise

— **Mobile effectiveness**

— **Improved costs,** better outcomes, and better experience

Maximising the EPR value

Deep integrations between Nuance Healthcare Solutions and Allscripts Solutions allow clinicians to use conversational user interfaces to create effective and comprehensive clinical documentation—while maximising the value healthcare organisations receive from their EPR.

Dragon Medical One in Allscripts Sunrise offers,

— **Cloud-based** and **secure speech**-enabled documentation for clinicians on the go, accessible through any browser with no additional software to install or usernames/passwords to remember

— **Full support** for PowerMic Mobile (Nuance mobile app. supported by iOS and Android platforms) hosted on Microsoft Azure in the United Kingdom, an ISO 27001 certified hosting infrastructure

— **Speech-to-text** capabilities outside Allscripts Sunrise, such as in Microsoft® Office.

Deliver unmatched outcomes for more than 500 Allscripts healthcare organisations worldwide—here are just a few examples of what they're saying:

"With Dragon Medical One, I can quickly and accurately dictate succinct thoughts instead of creating a note from a bunch of words from a pick list. It's immeasurable how it's helped me maintain my professional satisfaction and be efficient when creating patient notes and communicating with my staff."

— Steven H. Tai MD, FACP, CPE, Practicing General Internist, Nashville, TN

"We want to get paid for the quality of care and services we provide. It's not about the money, it's about improving patient care."

— Joann Hatton, Director of Clinical Documentation Management, Heritage Valley Health System
