

PoliceTech is evolving to meet the needs of the “whole officer”

Nuance® Dragon® Professional Cloud for law enforcement makes police documentation safer, faster, and accessible anytime, anywhere.

In a post-pandemic world, **new opportunities have emerged for technology to help police agencies** navigate the "Great Resignation" recruitment and retention challenges that have impacted myriad professions—including law enforcement. The documentation burden remains constant—yet new “non-core” aspects of the job are gaining in prominence.

The documentation burden on law enforcement continues, alongside optimism technology can help address new challenges

Report writing and filing incident reports **remains the biggest productivity drain** on officer productivity

Say **mandatory documentation has increased** in the past 18 months

Say **speech-to-text technology has a significant role** promoting apps that foster wellness, safety, and professional development

Cite virtual communication tools like Teams as **playing a more prominent role** in the administrative aspects of policing

Mobile and cloud native PoliceTech is expected to address new facets of policing

Mobility, ubiquitous connectivity, and the use of apps and other cloud native software to address new, heightened expectations of police officers is growing. Documentation remains a core requirement, yet as technology matures in law enforcement, **new applications to meet the needs of the “whole officer” have emerged.** Dragon Professional Cloud supports growing mobility needs with cloud native, locally installed on the MDC, and iOS/Android apps to connect an officer’s workflow from virtually anywhere.

Agree **officers need a connected workplace** of cloud hosted smart tools

Say mobile tech usage for purposes other than documentation **has increased in the last 18 months**

Indicate mobile phones and apps are **helping to automate** incident reports or streamline documentation processes

Cite agreement **their department is substantially more receptive** to secure, cloud-hosted applications that can be accessed by officers wherever an internet connection exists

Agree an AI-powered “virtual partner” **would be a welcome development** in modern policing

Dragon Professional Cloud for law enforcement makes police documentation easier and faster—from anywhere

Create incident reports 3x faster than typing, with up to 99% accuracy

Complete documentation in vehicle, at station, in-field or at home, with or without an internet connection

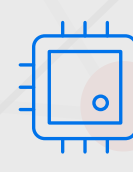

Enjoy **“always latest” access** to updates and enhancements with cloud-native solutions

Use Dragon Anywhere Mobile for iOS® or Android™ at no additional cost with a Dragon Professional Anywhere subscription

Retain the ability to use traditional Dragon Law Enforcement in areas without internet connectivity

Extend the life of older MDC's with a cloud-native solution requiring minimal “on-device” processing

Join the **hundreds of departments** using Dragon speech recognition to help improve incident reporting.
