

Real-time guidance to deliver quality metrics and workflow efficiency for pediatrics

AI-powered workflow for pediatric medicine.

Pediatric Guidance for Dragon Medical Advisor is a workflow-integrated Computer-Assisted Physician Documentation (CAPD) capability accessible through Dragon Medical One. This real-time pediatric guidance capability helps physicians capture true severity and acuity of pediatric patients by adding critical details that help improve quality, patient, and financial outcomes.

Designed specifically for the pediatric care setting, this solution includes the most meaningful diagnoses for pediatric patients. Pediatric Guidance helps identify concomitant diagnoses to enhance documentation quality at the point of care. This advanced in-workflow CAPD solution delivers:

- **Pediatric point of care advice** unobtrusively presented in the user's workflow, including impactful clinical information such as vital signs and lab values that can be turned off and on.
- **Advanced analytics** that offer insight into the most common pediatric diagnoses, response and agree rates, speech recognition adoption, utilization, documentation efficiency and more.

Pediatric Guidance for Dragon Medical Advisor integrates seamlessly into all leading EHRs to provide in-workflow advice for pediatric physicians. It helps capture high quality documentation that reflects the care provided including diagnosis specificity and clinical evidence—while saving our providers' valuable time.

EXPERIENCE MAKES THE DIFFERENCE

- **Dragon Medical Advisor** uses proven pediatric content in real-time to align improved physician documentation practice patterns and diagnosis capture.
- **Pediatric Guidance** integrates seamlessly into all the leading EHRs:
 - Delivers actionable guidance during clinical documentation
 - Supports free-text documentation
 - Diagnosis specificity and pediatric clinical evidence
 - Better documentation to support clinical care
