

# Nuance Diagnostic Solutions

Amplify radiologists' ability to impact the patient journey.

At Nuance, we reveal insights to drive action, quality, and efficiency to address failed follow-up, inefficient work practices, and an evolving healthcare landscape by amplifying radiologists' ability to impact the patient journey and outcomes.

Our unique capabilities are the broadest in the industry—delivering real-time intelligence in the workflow for planning and preparation, interpretation and reporting, communication and follow-up, and quality assurance. We ensure that every detail surrounding the radiologist's and care team's workflow is optimized to enable the best patient, clinical, and financial outcomes.

## A consultative approach for the long term

Nuance helps customers match the right solutions to their needs today, while positioning them for tomorrow. We put a priority on customer success and satisfaction, recognizing that getting there takes more than user manuals, a support line, and a trouble ticket system.

## Achieve incredible outcomes

By revealing insights and delivering real-time intelligence in the workflow, Nuance can help you meet and exceed your goals—from improvements in productivity and efficiency, to quality and safety improvements, to reductions in disruptions and delays.

## Game-changing solutions

Nuance's AI and cloud-powered innovations enable a comprehensive solution platform designed to drive action, quality, and efficiency while addressing some of radiology's most pressing challenges.

- **PowerScribe One** delivers an unrivaled radiology reporting experience with a totally new user-centric design and countless workflow enhancements that reduce fatigue, save clicks, streamline the desktop, and support remote reporting workflows.
- **PowerScribe Workflow Orchestration** eliminates workflow inefficiencies in even the most complicated multi-site, multi-specialty environments with

---

“We weren't looking for a vendor; we were looking for a partner. Nuance offered modules to solve today's problems and the ability to rapidly create innovative solutions to prepare for the challenges of tomorrow.”

an intelligent, vendor-neutral workflow management platform designed to ensure that each exam is assigned to the right clinical resource at the right time.

- **PowerScribe Follow-up Manager** closes the loop on patient follow-up recommendations, improving clinical and financial outcomes, by intelligently automating follow-up identification, extraction, and management to ensure patients don't slip through the cracks.
- **PowerScribe Lung Cancer Screening** automates and advances your LCS initiatives through a comprehensive end-to-end solution that proactively manages the growing influx of program participants and screening exams from enrollment through clinical follow-up and reporting.
- **PowerConnect Communicator** helps eliminate distractions, increase efficiencies, and streamline communication through a contextually aware platform that automatically associates messaging options with the active patient exam. A launchpad and single starting point for initiating ancillary communication and quality workflows, it supports ED prelim and discrepancy, call desk requests, technical quality assurance, teaching files, peer learning, peer review, and more.
- **PowerConnect Actionable Findings** creates notifications from within the radiology reporting workflow and delivers them to ordering clinicians. It closes the loop on communications to improve patient care and follow-up, satisfy compliance and audit requirements, meet national patient safety goals, and improve clinician satisfaction.
- **mPower Clinical Analytics** delivers actionable insights to improve business and clinical outcomes, with advanced search, data extraction, and reporting capabilities.
- **PowerShare Image Sharing** accelerates patient care delivery, reduces costs associated with delayed and inefficient image exchange, and offers new opportunities for growth and expansion by connecting healthcare facilities, providers, and patients for quick, convenient, and secure sharing of medical imaging and diagnostic reports—anytime, anywhere.

The only network of its kind, the **Nuance Precision Imaging Network (PIN)** is built on proven diagnostic imaging solutions used by over 80% of radiologists. With more than 10,000 connected healthcare facilities, it uses workflow integrated AI to deliver real-time clinical intelligence to multiple imaging stakeholders.

Nuance PIN is a scalable, AI-powered cloud solution that delivers persistent performance while connecting point-of-read to point-of-care across a single, secure platform.
