Turn your smartphone into a **secure wireless microphone**

PowerMic™ Mobile gives clinicians the freedom to complete clinical documentation using a smartphone as a wireless microphone.

**More freedom, the same PowerMic experience**
PowerMic Mobile turns your smartphone into a secure wireless microphone for use with Windows-based desktop clinical speech recognition solutions. Optimised for use with Dragon Medical Direct and other Nuance healthcare solutions, PowerMic Mobile gives clinicians the freedom to roam from workstation to workstation, room to room, and location to location to complete clinical documentation using a smartphone as a wireless microphone at the desktop.

**Subscribe**
Healthcare organisations subscribe to PowerMic Mobile, and clinicians simply download the iPhone or Android app.

**Connect**
Users log into any supported PC and their smartphone automatically pairs with the workstation to provide wireless connectivity for audio capture.

**Capture**
The smartphone’s microphone captures the audio and inputs it directly into the desktop Nuance speech recognition solution, functioning just like the PowerMic, including user programmable buttons.

PowerMic Mobile enhances clinician productivity and convenience with support for virtualised EMR deployments, user programmable buttons, and 256-bit encryption with end-to-end security over WiFi or cellular networks. Clinicians can now opt to use PowerMic Mobile as a complimentary input device, or as an alternative, to the PowerMic or other supported handheld or headset microphone.
Features and benefits

Greater clinician mobility
Clinicians can complete their patient notes at any available workstation, with or without a hard-wired microphone, as soon as they meet with each patient.

Scalable and centrally managed
PowerMic Mobile is highly scalable so it can grow with your organisation and offers web-based central management for configuring and managing user accounts and preferences.

Works with virtual desktops
Desktop or thin client, at work or outside the office, PowerMic Mobile offers greater clinician mobility throughout the hospital, clinics, and at home with vendor-agnostic and endpoint agnostic support for virtualised EMRs.

Automatic workstation pairing
PowerMic Mobile offers several intuitive mechanisms for pairing mobile devices with target applications, including Windows Login ID, Nuance Application Username, or token-based pairing.

User programmable buttons
PowerMic Mobile make dictation easier and faster with programmable on-screen buttons to control audio capture, navigate templates, and effortlessly move through clinical documents for review and editing.

Compatible with iOS and Android
App distribution via the App Store and Google Play Store significantly simplifies end user roll out.

Perfect companion to PowerMics
Support individual clinician preferences and workflows by offering a combination of hard-wired PowerMics and PowerMic Mobile throughout the healthcare organisation.

Optimised for Nuance solutions
Designed to work with any Windows-based desktop solution, PowerMic Mobile has been fully tested and Optimised for use with Dragon Medical Direct and other Nuance healthcare solutions.

"PowerMic Mobile has created a lot of enthusiasm around mobility and technology and, therefore, Dragon Medical and physician documentation"

Dr. Stephanie Lahr
Chief Medical Information Officer
Kootenai Health

Subscription and licensing
PowerMic Mobile requires an enterprise subscription. If your healthcare organisation does not have a subscription to PowerMic Mobile, please contact your Nuance account executive. If your organisation has an active subscription, please contact your site administrator for installation instructions for how to download and activate PowerMic Mobile on your personal wireless device.

System requirements
Hosted Nuance Management Server (NMS) and enterprise license subscription required. Minimum device requirements include iPhone 5 (with iOS 9.3+) or Android 6 with Internet connection and Windows 8.1.
