Capture the complete patient story naturally and efficiently.

Next-level speech-driven clinical documentation with secure, convenient, and comprehensive support from pre-consultation through post-consultation.

**Fast, flexible, and future-proof**
Built on a modern architecture, Dragon Medical One, the industry’s #1 rated conversational AI workflow assistant and documentation companion, empowers clinicians to create comprehensive clinical documentation and more naturally navigate workflows using just their voice.

— **Unrivalled accuracy.** Sophisticated speech capabilities allow you to dictate high-quality notes. Achieve 99% accuracy, including automatic accent detection and audio calibration, with no voice profile training.

— **Dictation done better.** Advanced speech with natural language commands promotes an efficient approach to documenting care before, during, and after the patient consultation. Clinicians decide how and where documentation gets done—from dictating at the cursor to using an integrated dictation box, as well as modern browser support.

— **Personalised productivity boosters.** Streamline documentation by creating voice commands and custom vocabularies across individuals, departments, and healthcare organisations.

— **Extra mobility.** When paired with PowerMic Mobile, any workstation becomes a dictation station, giving clinicians freedom to document notes using their smartphone as a secure wireless microphone.

— **Consistent voice experience.** Easily manage licenses, deployments, and default settings to ensure an efficient, familiar, and predictable experience across care settings, devices, and apps.

— **Industry-leading architecture.** With remarkable responsiveness and resilience, this ISO 27001 - certified solution enables broad integration and seamless support for both browser and web-based EMRs—giving you the flexibility you need in the environment you want.

**Hosted within Microsoft Azure data centres in Australia**

Dragon Medical One is hosted within Microsoft Azure hosting infrastructure in Australia supporting the high availability, business continuity, and security demands of the country.
Ease access for an improved workflow experience
Using integrated voice capabilities, Dragon Medical One alleviates the administrative burden on clinicians. By reducing repetitive tasks and easing information access, clinicians can spend less time on documentation—and more time with patients.

Custom capabilities
Create your own voice experience by automating tasks such as EMR navigation, orders, and notes. Go beyond clinical workflows to draft personal emails, navigate Microsoft Office documents, and search the web.

Boost efficiency and improve performance
Use analytics to track and monitor KPI trends while maximising individual and group-level performance with actionable intelligence. Identify opportunities for ongoing improvement and measure performance against hundreds of thousands of users across all healthcare organisations.

When people aren't talking to Dragon Medical One, they're talking about it
“It gave us quite considerable time back and we talk about at least 2min per patient being given back to every clinician which is a 30% reduction of time spent in documentation. Now at the end of the day it can count up to quite considerable time you as a clinician can get back.”
— Pieter Nel, Chief Digital Director Medical Services, Mackay Hospital, Australia

“My patients are consistently amazed as I dictate and make corrections with them on-the-spot. Not only is this process faster, it also means that letters, tasks and messages can be sent instantly.”
— Mr. Tao Shan Lim, Orthopaedic Surgeon Joondalup Orthopaedic Group Perth, Western Australia
