Get more done on your PC by voice.

From students to parents to everyday multi-taskers, there’s no better way to get more done on your PC simply by speaking than with Dragon® Home, version 15, the most intelligent speech recognition solution for home use.

Designed using Nuance® Deep Learning™ technology, Dragon Home intelligently takes your spoken words and transcribes them into text with up to 99% recognition accuracy, adapts to different accents, and even works in noisy environments.

Simply speak and watch your words appear on the screen 3x faster than typing. Dictate documents, send email, search the Web, and more. Work hands-free and speak commands to launch applications and control your computer – all by voice.

**Dragon Home advantages**

- Featuring Nuance Deep Learning technology means Dragon understands what you say as soon as you start dictating, without the need for training.
- With Dragon Home, you never have to be connected to the internet to dictate your documents and control your PC by voice.
- Use Dragon on major Windows® form factors, including today’s popular touchscreen PCs and tablets, and enjoy the versatility of interacting with your PC and favorite applications, whether at home or in school.

**Exceptional capabilities**

- Simply speak and watch your words appear on your computer screen. Create documents, get through your “to-do” list, send email or surf and search the Web – faster and more intelligently than ever before.
- Dragon Home is easy to install, simple to use, and makes even mundane PC tasks faster and more enjoyable.
- In addition to DragonPad, Dragon’s built-in text editor, you can use Dragon Home with popular Windows applications. Dictate documents with Full Text Control in Microsoft Word®, send email in Microsoft Outlook®, search the Web using Internet Explorer®, Mozilla Firefox® or Google Chrome™, post to Facebook or Twitter and more – all by voice.Dragon Home even enhances the experience of using your voice with the most popular web-based email application—Gmail™—offering Full Text Control and commands for the most frequent actions in Internet Explorer 11, and the latest

**Key features and benefits**

- A next generation speech engine allows you to dictate 3x faster than typing with up to 99% accuracy
- Streamlined user interface allows you to quickly select the options you need and start turning your voice into text right away
- Easy proofreading with Playback feature that reads your dictation back in your own voice
- Dictate text within popular applications, including on the Web
- Create, format and edit by voice – think out loud and break creativity barriers
- Flexibility to select microphones, including those built into many laptops
- Intuitive design and helpful tutorials – easy to get started and easy to master
