

Dragon Anywhere

feature comparison

Professional dictation on your mobile device

Feature	Description	Dragon Anywhere Group	Dragon Anywhere
Create documents from your mobile device	Use dictation on any Android and iOS device	•	•
Dictate documents as long as you want	Dictate an unlimited number of words; our cloud-based dictation solution has no time limit either	•	•
Edit and format with your voice	You can choose to use your voice, or your device's keyboard, to edit and format documents	•	•
Share documents from your mobile device	You can use email or applications like Dropbox and Evernote to share your documents.	•	•
Get your work done faster	Speech is 3Xs faster than typing and Dragon Anywhere is highly accurate right out of the gate with no training required. There's no need to decipher handwritten notes or to try to recall details from hours before. Employees can dictate in real-time to ensure reporting accuracy.	•	•
Create form-based templates to speed field reporting	Using the auto-text feature, field workers can create fillable forms, such as client intake forms, in just a few steps. Once created, they can navigate from field to field using simple spoken commands and fill in all the content by voice.	•	•
Quick and easy central management	Dragon Anywhere Group includes powerful management tools with the Nuance Management Center, a web-based environment that enables central administration at a user, group, site, or organization-wide level.	•	
Work across devices to drive professional productivity	Seamless synchronization across devices or the latest versions of Dragon Group desktop products means mobile professionals can remain productive wherever work takes them. Paperwork can be started in the field and completed back at the desktop, with the same customized dictation experience on any device.	•	
Enjoy volume discounts with our license program	Nuance's Open License Program (OLP) benefits multiple subscription purchases of Dragon Anywhere Group for your organization. Move into higher discount tiers quickly based on lifetime cumulative purchases.	•
