

Drive adoption of TrakCare with Dragon Medical One.

Speech-enabling TrakCare with Dragon Medical One, making it faster and easier for clinicians to update the EPR.

Nuance collaborates with InterSystems Healthcare to enable more complete, accurate, and timely documentation within the electronic patient record (EPR)— improving patient care and increasing staff satisfaction. Our AI-powered speech recognition solution Dragon Medical One seamlessly voice-enables TrakCare and delivers 99% accuracy from the start with NO voice profile training required.

Dragon Medical One is a cloud-based solution, providing doctors, nurses and allied health professionals with a single voice profile that can be accessed on different devices in different locations. Individual user speech profiles, including custom vocabularies and autotext templates, are sharable across devices and apps. With Dragon Medical One, clinicians can document directly within the EPR or generate voice-driven content outside the patient record.

Use voice commands to navigate TrakCare more quickly and easily, dictate:

- at the cursor within TrakCare modules
- into the EPR with a mobile device (an alternative to using a tethered microphone) using the Nuance PowerMic mobile application which is supported on iOS and Android platforms

Strategic collaboration

Nuance is collaborating with InterSystems to deliver world-class care across the hospitals, enhance the digital transformation journey and empower the future of care.

WHY INTERSYSTEMS HEALTHCARE CLIENTS CHOOSE NUANCE

- **AI-powered** speech recognition
 - **Clinical approach** and content backed by 25 years of expertise
 - **Mobile effectiveness**
 - **Improved costs**, better outcomes, and better experience
-

Maximising the EPR value

Dragon Medical One allows clinicians to use conversational user interfaces to create timely, accurate and comprehensive clinical documentation—while driving successful adoption and maximising the value hospitals receive from their EPR.

Dragon Medical One in TrakCare offers,

- **Cloud-based** and **secure speech-enabled** documentation for clinicians on the go, accessible through any browser with no additional software to install or usernames/passwords to remember
- **Full support** for PowerMic Mobile (Nuance mobile app, supported by iOS and Android platforms) hosted on Microsoft Azure in the United Kingdom, an ISO 27001 certified hosting infrastructure.
- **Speech-to-text** capabilities outside TrakCare, such as in Microsoft® Office.

“Doctors considered voice recognition for clinical documentation as most useful for improving efficiency in patient care”.

Deloitte Center for health solutions,
Time to care—securing a future for the hospital workforce in Europe, 2017

LEARN MORE

nuance.co.uk/healthcare

According to a UK study conducted and analysed by Ignetica research consultancy:

- Over **50%** of clinicians' time is **spent** on clinical documentation
 - **52 minutes** per day spent searching for information
 - **63 minutes** per clinician per week spent rechecking information
 - **1 in 4** times the information wasn't available to the level required
 - The value of time for a doctor searching for **missing** information is nearly **£20K** per doctor per annum
 - **More complete notes support patient journeys and avoid delays.**
