

Effectively capture the unique patient story from anywhere with AI-powered, secure cloud-based Dragon Medical speech recognition

Worldwide

4 out of 5
facilities that use Epic
use Nuance

> **60,000**
clinicians

> **300**
healthcare organisations

Dragon Medical speech recognition uses NLP/NLU to provide accurate voice-enabled clinical documentation within Epic.

80%

speech recognition adoption in first year

generates

70%

of total voice-driven documentation
– Allina Health

Physicians are able to capture **65%** more documentation per hour—resulting in more comprehensive patient stories.
– Piedmont Healthcare

Dropped average documentation time by **45%** decreasing time spent after hours.
– Rush University Medical Center

95% of physicians believe Dragon Medical One makes it easier to document in the EHR.
– The University of Kansas Health System

Easy-to-use solutions help boost EHR adoption and standardise clinical documentation.
– Northern Health

Choose Dragon Medical to ensure that all data are promptly available in the Epic EPR, improve the way patient care is delivered across the Trust and give time back to the care teams.

Patient journey - Making an impact

State-of-the-art technology, AI-powered, cloud-based

Seamless experience
Single voice profile

Accurate speech recognition
Dictation at cursor with own device

Real-time patient's data collection

Less time spent on documenting
More time with patients

Empowers clinicians to complete clinical documentation in a more natural way and achieve unprecedented results.

What can help reduce the workload of documentation in the hospital?

AI-powered speech recognition solution for documenting across the continuum of care.

Deliver comprehensive clinical documentation along the care journey with **Dragon Medical speech recognition**.

Improve the coordination of patient care, increase the satisfaction of care teams, enhance the patient's well-being and drive better outcomes, at the bedside, post-take rounds, over emergency situations, and during staff meetings.

Dragon Medical One

Dragon Medical One is a secure, cloud-based speech recognition solution that allows clinicians to document the complete patient journey—anytime, anywhere.

Single voice profile.

AI-powered.

Unprecedented accuracy.

Mobile. Reliable.

Comprehensive clinical documentation anywhere, anytime.

Gateway to the Future.

PowerMic Mobile

PowerMic Mobile turns clinician's smartphone (IOS/Android) into a secure wireless microphone for use with Windows-based desktop clinical speech recognition solutions.

Placing the patient at the centre of healthcare

Using front-end speech recognition within EPRs has become a cornerstone to improve the efficiency of patient care. Dragon Medical speech recognition offers a seamless experience in the Epic EPR.

Patient experience and satisfaction have been demonstrated to be the single most important aspect in assessing the quality of healthcare. Medical ward rounds are complex clinical activities, critical to provide high quality, safe care for patients in a timely relevant manner. Evaluating and gathering relevant patient data is essential to qualify the situation at a given time while reassuring the patient is crucial. Having a mobile solution at hand, at patient's bedside helps dictating short notes quickly into the EPR, drives better continuum of care and allows clinicians to have time to focus on the patient rather than writing.

Harness the power of Dragon Medical One and capture the detailed narratives (i.e. clinical assessments) easily with PowerMic Mobile, a simple and fast AI-powered, cloud solution capturing high-quality clinical data within the patient record at the point-of-care. Help reduce the administrative burden on the entire healthcare team and reduce spending on transcription. Moreover, clinicians can create, review and/or modify prescriptions; complete reports – simply with their voice.

Investing in cutting-edge technology, the foundation of future solutions, allows for a faster return on investment and is part of a long-term collaborative vision.
