

# Nuance Dragon Legal Group

For enterprise legal professionals.

If you work in a legal organization, Dragon Legal Group is the perfect documentation productivity solution for you and your staff.

Dragon Legal Group enterprise-ready speech recognition software with legal-specific language model is designed specifically for the legal industry. It enables fast, accurate dictation with robust customization features to improve documentation productivity for multiple users within a legal organization—whether they're in the office or on the road. Attorneys and other legal professionals can lower transcription costs and reduce dependence on support staff, ultimately enabling them to spend more time with clients and increase billable hours. This powerful solution, which provides support for Citrix virtualized environments, and can be centrally administered with usage tracking and license management through the Nuance® Management Center, helps legal corporations work smarter and more efficiently for bottom-line results.

## Legal-specific language model

Dragon Legal Group is trained using more than 400 million words from legal documents—that delivers optimal, recognition accuracy for dictation of legal terms right from the start. To further increase accuracy, you can create, import and share custom word lists that are relevant to your clients and areas of specialty. Dragon also enables you to format legal citations automatically and leverage third-party correction features to speed document turnaround and free support staff to focus on higher value tasks.

## Fast, easy deployment, customization and management

Dragon Legal Group, along with Nuance Management Center, enables administration across multiple Dragon users to save time and reduce support needs. The enterprise-ready solution makes it easy for IT administrators in legal organizations to:

- Customize the installation and deployment to multiple computers
- Manage and maintain (modify, repair, upgrade, remove) Dragon and all associated user profiles and configurations

---

Designed specifically for the legal industry, Dragon Legal Group offers many benefits for:

- **Legal organization leaders** such as Partners, Associates, Chief Legal Counsel or corporate in-house legal leaders who wish to boost productivity and profits by increasing employee efficiency or streamline transcription workflows, for bottom line impact.
  - **Corporate IT leaders** in legal firms who look for efficient deployment, support and customization through central license and usage management to save time and cost.
  - **Legal professionals or legal assistants** who spend a lot of time with clients and writing case reports—at the office or on the go—and who often use specific legal vocabulary, client or industry-specific terminology or formatted legal citations, when they are creating documents or transcribing recorded notes.
-

You can deploy Dragon to multiple desktops using the built-in Windows Installer (MSI) with customized options. Because all Dragon Legal custom commands and vocabularies can be shared, it's fast and easy to push out customization updates as needed.

The solution's centralized administration features allow you to track which employees have created user profiles and control where they are stored to facilitate license management compliance. With control over all user configurations, you can more efficiently schedule maintenance tasks, such as tuning using the Acoustic and Language Model Optimizer.

### Central administration of Dragon Legal Group

The Nuance Management Center (available separately) provides central user administration capabilities that allow legal corporations to easily enable and manage Dragon Legal Group deployments. It helps legal businesses use licenses more efficiently, better meet requirements for reporting accuracy, and centrally manage their Dragon deployments to save time and reduce operating costs.

For legal organizations, the Nuance Management Center can easily manage both Dragon Professional Group and Dragon Legal Group licenses, depending on the individual users' needs. An administrator for example, can easily assign or switch a license via a license key, saving time by centrally managing both product deployments as needed.

### Share customizations with Dragon Anywhere Mobile

Dragon Anywhere Group is an enterprise-ready, professional-grade, cloud-based dictation solution for busy legal professionals who want to work faster and smarter using their mobile device. Dragon Anywhere Mobile lets you customize words and create boilerplate text or commands to dictate and edit documents of any length by voice—quickly and accurately—directly on your iOS or Android device. Your documents can be shared and customizations synced up with Dragon Legal Group, so you can continue your work seamlessly wherever you go. Easily enable and maintain Dragon Anywhere Mobile for multiple legal professionals in your organization, including centrally managing subscriptions, tracking usage, and automatically sharing customizations. By being more productive on the road, you and your employees can focus more time on clients.

### Drive productivity with custom commands

Dragon Legal Mobile makes it easy for organizations to create custom commands to automate repetitive or manual processes, integrate them into existing workflows, and share them across the user community. Because these custom commands can be distributed to multiple users, employees are able to use them for immediate productivity gains instead of having to create them on their own.

Dragon Legal Group offers many options for creating custom commands to meet your workflow needs:

---

## KEY FEATURES/BENEFITS

- Legal-specific solution with special language model.
  - **Format** legal citations automatically.
  - **Get support** for Citrix virtualized environments.
  - **Share customizations** with Dragon Anywhere Mobile and manage through Nuance Management Center.
  - **Speed and simplify** central administration with Nuance Management Center for both Dragon Professional Group and Dragon Legal Group products.
  - **Enjoy easy deployment and customization** across multiple Dragon desktops.
  - **Create and deploy** custom commands and vocabularies for multiple users.
  - **Enhance** on-the-go attorney productivity.
  - **Perform** easy batch.
-

- Open-ended custom commands: Dragon Legal Group allows for custom command types that support open-ended dictation, letting you to end the command's name with any word or phrase in Dragon's vocabulary, as opposed to a word or phrase from a defined list of command variables. This enables users to have, for instance, commands that search for given words within their company's intranet (similar to the built-in search commands such as "search Wikipedia for...").
- Dragon templates: Filling out forms and files that have fields can be a challenge, but Dragon Legal Group makes it easy to complete the task using your voice. With the ability to add variable fields to a template in any text document, Dragon Legal Group speeds and simplifies the process of filling in commonly used forms. You just have to say "next field" to navigate to each form field.
- Macro Recorder: Use Dragon's Macro Recorder to record your keystrokes and mouse-clicks, and then save the series of actions under a single voice command. This is a great feature for instantly executing commonly-used tasks that would normally require a series of multiple commands or hand actions.
- Step-by-Step commands: The Step-by-Step option in Dragon's command-creation wizard lets you automate a series of actions (such as launching applications or invoking certain application features). This feature makes it easy to automate an action or series of actions with a single voice command, even if you're not a programmer.
- Advanced scripting: Those with some programming knowledge can use Dragon's VBA-like advanced scripting to voice-enable specific custom functions on the computer in order to better integrate with your existing applications and workflows.

### **Increase dictation accuracy with custom vocabularies**

Even within a legal organization, different employees may use different vocabulary on the job. For example, attorneys would have a need to use legal vocabulary and automatically format legal citations in preparing their case notes. Other employees in a legal organization or in an organization with a corporate legal department such as in HR or accounting, may not need to frequently use a legal vocabulary, but have other custom terminology needs.

Dragon Legal Group lets you add custom words with any preferred formatting properties directly to the vocabulary so the software accurately types your dictation the way you want it to appear. You can import and export these vocabularies as needed—in formats such as XML—for easy sharing of customizations across specific user groups, departments, or the entire organization. Multiple vocabularies can be created, and managed by administrators to meet employee requests.

### Easy batch processing and post-editing of transcriptions

With Dragon Legal Group, you can automatically transcribe into a selected directory with a specified profile and the audio portion of your dictation can be embedded in the document through the AFTA (Auto Transcribe Folder Agent) process. Storing the audio file with the automatically transcribed documents saves time and simplifies editing by the user or a third party. You can even include “voice notations”—spoken instructions for third-party editors that you don’t want transcribed—in Microsoft Word.

### Nuance PowerMic support

Dragon Legal Group supports Nuance PowerMic. PowerMic is a robust, ergonomic handheld microphone featuring simplified, thumb-control operation (for dictating, editing, navigating, and reviewing documents using speech recognition), programmable buttons and integrated mouse functionality. It is ideal for legal professionals who are looking for new levels of dictation speed, ease-of-use and productivity.
