

Dragon Home 15 — Quick Start Guide

Install Dragon

1. **Exit any open program.** If an **anti-virus** program is running, turn it off until after the installation ends.
2. Put the Dragon **DVD** into your PC or **open your download file.**
3. Enter the **serial** number found on the DVD sleeve or, for a download, in the email you received.

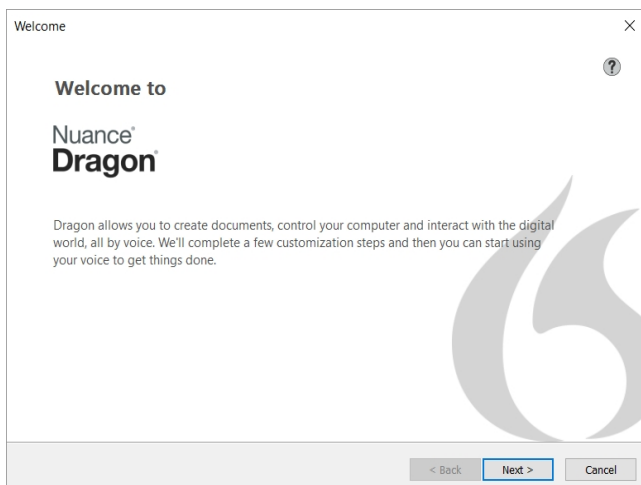

Once installation ends, start Dragon (double-click its icon on the Desktop).

Choose your microphone

If applicable, **connect** your microphone; if you simply use your PC's built-in microphone, Dragon will detect it. Dragon will list the microphones available to your PC, indicating which one is active. Choose the one to use.

Create a user profile

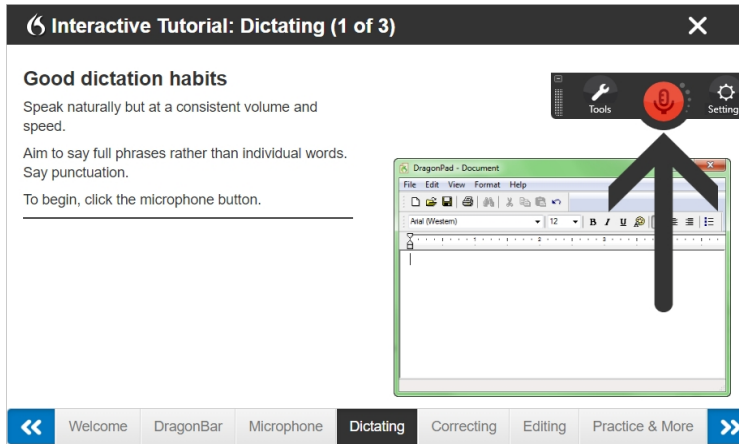

The first time you start it, Dragon guides you to create the best possible user profile for you.

A profile is a set of files that store information Dragon uses to transcribe what you say, such as how you sound.

Your profile will become more and more precise the more you use Dragon.

For details, click the Help icon on each screen.

Complete the Interactive Tutorial

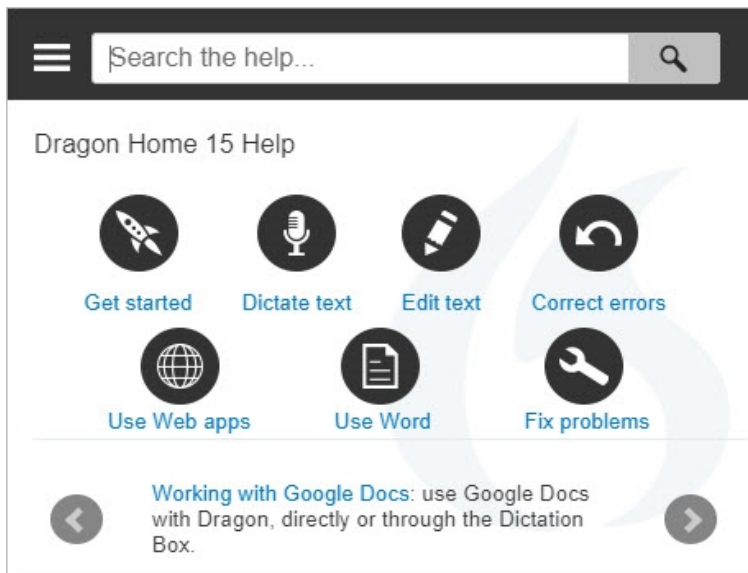

These **short progressive simulations** develop essential skills including:

- pausing before and after commands
- changing a hotkey or other setting
- adding a personal word

At any time, you can exit the Tutorial then return through the Help menu.

Open the Help

The Help includes tips and instructions, including troubleshooting and how to use Dragon in various applications.

Click the DragonBar's question mark icon (?) then select **Help Topics**.

Make Dragon listen... or not

On: *Dragon is listening*

Off: *Dragon can't hear anything*

One can control Dragon's microphone by:

- **Clicking its icon** on the DragonBar or System Tray.
- **Pressing its hotkey** (by default, the + on the numeric keypad).
- **Saying commands** such as "Wake up" and "Microphone off."

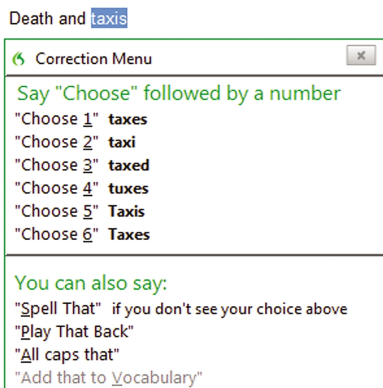

Ensuring Dragon listens when desired is an important habit!

Your first dictation

Open Microsoft Word, Notepad, or DragonPad. Make sure the cursor is in the document, turn on the microphone, think of a few sentences then dictate them. Say punctuation (colon, question mark, etc.) and practice the commands "**New paragraph**" and "**New line**".

As you speak, a small icon  indicates that Dragon is processing. No need to wait for Dragon to "catch up." Use a natural pace and tone. Speaking in longer phrases gives much better results than halting speech.

Correcting errors

Though you can boost accuracy by personalizing the vocabulary, some errors will occur. Dragon will learn from them if you correct them, which it lets you do several ways.

When Dragon misrecognizes what you just dictated, you can say "**Correct that.**" This displays the Correction Menu, which lists alternatives.

If the correct alternative is on the list, choose it.

If not, say "**Spell that**" to open the Spelling window, where you spell or type what Dragon should have written, or modify an almost-correct alternative.

Punctuation

Note: To click a button, menu or other item, say its name preceded by "**Click**," e.g. "**Click OK**."

Learning more

At first, focus on getting used to dictating fluidly and personalizing the vocabulary to include the **unusual words you need**.

Progressively, you'll use more capabilities. Explore **tools** and **settings** as needed.

You can always:

- say "**What can I say**"
- search the Help with a direct command such as "**Search Help for hotkey options**"
- click the ? icon and return to the Tutorial
