On November 30, 2018, at approximately 10:00 PM, I was dispatched to 3191 Oak Street for a suspected burglary. I arrived at the address and met with the responding officer who told me that the homeowner, Mr. Fred Brown, returned home from a night out with friends to find his back door smashed-in. Mr. Brown did not enter the premises but called the police from his mobile phone. Officer Smith searched the home for intruders. No intruders were found however, there was evidence of someone having been in the house. I walked through the house with Mr. Brown to identify any missing items. Mr. Brown will prepare a completed list with serial numbers and bring it to the station tomorrow afternoon.

The evidence collection team was called in to take fingerprints and photographs. The following evidence was collected: Photographs of the damaged back door frame. Photographs of footprints in soft earth near back door. Fingerprints taken off of back door frame. Fingerprints taken off of kitchen counter tops, desktop in study, and chest of drawers in master bedroom.
