Proactive Engagement for business results

Orchestrated, automated customer outreach across text, voice, email, and push channels.

Your customers want proactive outreach from your business. In fact, 85% of consumers are interested in receiving proactive notifications.\(^1\) And an astounding 90% of consumers say they are more likely to do business with a company that sends them reminders.\(^1\)

That’s where Nuance comes in. The Nuance Proactive Engagement Platform is a modern, flexible, multi-tenant cloud platform enabling orchestrated outbound communications across text, email, voice, and push channels.

Nuance Proactive Engagement allows you to inform or remind customers about appointments, payments due, delays or changes, and much more. In addition, the platform enables ad-hoc, one-to-many, critical notifications for situations such as planned and unplanned events like service changes, updates, or outages, and also for emergency or crisis situation communications.

The solution also helps to deflect expensive voice calls to digital channels by using outbound two-way notifications with Natural Language Understanding (NLU) and enabling consumers to initial inbound text to landlines and 1-800 numbers.

Drive desired consumer actions with inform/remind

Many consumers believe that sending proactive communications helps them avoid issues like late payment fees, account overdrafts, missing a delivery, or missed appointments. In fact, these same consumers say that they would call customer service or start a live chat if a company did not proactively communicate with them about an issue.

Given the costs associated with live agents, using the Nuance Proactive Engagement Platform Inform/Remind solution to communicate proactively makes financial sense. It increases the likelihood that customers will take action while reducing inbound operational costs through call deflection.

\(^1\) 2015 Wakefield Research, ‘What Consumers Want’
Enable better business results with collections
In addition to informing and reminding customers about important issues, most businesses need to assure that their accounts receivable are being managed properly. The Nuance Proactive Engagement Collections solutions can help with important collections activities.

With automated, orchestrated communications sent on the channels that consumers prefer, a company can cost-effectively collect payments, leading to higher cure rates, and lower downstream costs.

In addition, the platform automates the entire collections lifecycle, freeing up agents to focus on higher risk, higher value accounts, all while helping to stay in compliance with state and federal regulations.

Deliver critical communications with message on demand
Communications preparedness can help mitigate the impact of prolonged downtime or crisis situations. The Message on Demand solution is an easy to use offering with an intuitive user interface, making ad hoc communications to large numbers of people easy to deliver. It’s also fast to deploy, allowing users to quickly create or modify messages and effectively communicate to many people on their preferred channel with personalized, timely, and contextual messages over voice, email or text channels.
