

Capture the necessary details more easily with Dragon Medical Advisor.

Align the care team with in-workflow documentation advice that impacts clinical quality, risk adjustment and coding.

Every patient deserves an accurate clinical story

Nuance® clinical documentation solutions make it easy for physicians to capture each patient's story accurately across the continuum of care. Nuance Computer-Assisted Physician Documentation™ (CAPD) solutions provide real-time advice as physicians describe the complaints, history, assessment and plan that inform care decisions and impact quality outcomes. Nuance CAPD solutions fit naturally into their workflow, freeing up time to focus on what matters most—taking care of patients.

Efficiency and specificity without compromise

Dragon® Medical Advisor is a next-generation CAPD solution, backed by artificial intelligence, that works with Dragon Medical One to analyze physicians' notes in real time—whether dictating, typing, using template-based documentation or using any combination of methods. As an intelligent workflow companion, Dragon Medical Advisor identifies areas where additional specificity is necessary and prompts the physician with the options for that detail. Dragon Medical Advisor avoids alert fatigue by reviewing all notes for the encounter before requesting specificity, and fades into the background as the physician learns what details are required and documents more completely.

Thorough and concurrent documentation contributes to an accurate clinical picture of the patient and promotes better coordination of services and communication between care providers. In this era of often-changing regulations, coding and quality teams receive the details needed to report accurate outcomes and initiate appropriate reimbursement. And your healthcare system has the support it needs to deliver the best possible care—all while being acknowledged for it.

Intelligent and natural workflow designed by physicians

- Works seamlessly with Dragon Medical One to provide unobtrusive advice
 - Integrates into existing physician workflow and supports all EHRs
 - Analyzes physician narrative—speech, typed text, copied text and templates
 - Accelerates billing, improves compliance, better reflects risk adjustment and identifies potential clinical quality concerns
 - Improves communication between providers
 - Reduces number of CDI and coding queries to physicians and increases their satisfaction
-

Dragon Medical Advisor positively impacts note quality, compliance and reimbursement

Dragon Medical Advisor analyzes patient notes as they're being created so physicians can immediately update their documentation with the appropriate level of specificity while details of the patient visit are in front of them. Notes are more precise and complete, and clinical documentation improvement (CDI) teams are better able to evaluate opportunities and safeguard appropriate value-based reimbursement.

Accelerates billing and reduces denials. Advises on the most common ICD-10 diagnoses impacting DNFB and HCCs for risk adjustment.

Identifies clinical quality opportunities. Brings to light and prioritizes potential Patient Safety Indicators and Hospital-Acquired Conditions so physicians can take immediate action.

Improves care team communication. Additional detail in the notes means the care team is more informed about the full patient story.

Reduces post-discharge and out-of-context queries. Fewer queries from CDI and coding teams about common conditions alleviate downstream burden and increase clinician satisfaction.

Dragon Medical Advisor is part of a widely embraced approach to CAPD, and is backed by opportunity assessment tools and services to monitor program performance and analyze physician activity. Nuance helps clients target key physicians who need assistance transitioning to new documentation standards, and drives improvement with extensive experience in positive change behavior.

Ready to take your documentation to the next level?

If your organization is already using Dragon Medical One, you can activate Dragon Medical Advisor without installing additional hardware or software.

To learn more about how Nuance can help you improve financial performance, raise the quality of care and increase clinician satisfaction, please call 1-877-805-5902 or visit nuance.com/healthcare.

Nuance provides a more natural and insightful approach to clinical documentation, freeing clinicians to spend more time caring for their patients. Nuance healthcare solutions capture and communicate more than 300 million patient stories each year helping more than 500,000 clinicians in 10,000 healthcare organizations globally. Nuance's award-winning clinical speech recognition, medical transcription, CDI, coding, quality and diagnostic imaging solutions provide a more complete and accurate view of patient care, which drives meaningful clinical and financial outcomes.

About Nuance Communications, Inc.

Nuance Communications, Inc. is a leading provider of voice and language solutions for businesses and consumers around the world. Its technologies, applications and services make the user experience more compelling by transforming the way people interact with devices and systems. Every day, millions of users and thousands of businesses experience Nuance's proven applications. For more information, visit www.nuance.com/healthcare or call 1-877-805-5902. Connect with us through the healthcare blog, [What's next](#), [Twitter](#) and [Facebook](#).

“We took a look at the bigger picture of voice recognition technologies and discovered how evidence-based guidelines and new therapies are exploding in this space, and we found that only Nuance is on the leading edge of this trend toward higher-order voice recognition solutions.”

Brian Lancaster, Executive Director of Information Systems, Nebraska Medicine

Implement with confidence—sustain with measurable outcomes

The Nuance Customer Success Organization (CSO) uses assessment tools, support and guidance to direct clients in assessing physician utilization and CDI opportunities. This helps determine areas of focus, tailor education, proactively monitor program success and support sustainable outcomes.
