Capturing the complete patient story naturally and efficiently

Cloud-based HITRUST CSF-certified clinical speech recognition platform for documenting care in the EHR and beyond.

Clinicians, not technology limitations, should dictate the patient story. With Nuance Dragon Medical One AI-powered speech recognition, clinicians use their voice to navigate screens, dictate content, and pull EHR data directly into their notes. A single voice profile with personalized commands delivers consistent performance in EHRs, desktop applications, browsers, and mobile clinical documentation apps across locations, devices, and platforms. Whether conducting in-person and virtual consults, clinicians spend less time creating documentation—anytime, anywhere—in the EHR and beyond.

Conversational AI backed by virtual assistant capabilities

To further improve the patient and provider exam room experiences, Nuance leads the industry in conversational intelligence with virtual assistant capabilities embedded in Dragon Medical One. This collaborative technology is powered by deep learning and AI technology to augment speech recognition performance.

Higher-quality documentation with greater clinician productivity

— **Always available.** Dragon Medical One is designed for speed, accuracy, and flexibility, with personalized vocabularies and templates that can be accessed and shared across the widest range of devices in the industry.

— **Easy to install and maintain.** No complex configurations; clinicians can begin dictating in less than five minutes using your existing infrastructure. Automatic updates mean less work for your IT staff and less hassle for your clinicians.

— **Greater accuracy and automatic updates.** Using the latest deep-learning techniques and neural-network technologies, Dragon Medical One achieves 99% accuracy with no voice profile training required, and a single cloud-based profile that is auto-established at first use. Activities that were once manual, such as accent adjustments and microphone calibration, are now automatic, providing greater accuracy, a lower word error rate, and an optimal experience from the start.

A secure platform that speaks to everyone.

— Designed with virtualization in mind, it integrates seamlessly with your existing EHR.

— Clinicians are more productive with fast, accurate, and responsive dictation.

— Virtual assistant skills automate high-value clinical tasks.

— Secure wireless microphone app supports even greater portability.

— Access in-workflow guidance through integrated CAPD across specialties and care settings.

— More complete narratives lead to faster reimbursement.

— Provides analytics and insights to inform better decisions.

**2021 #1 Best in KLAS for Speech Recognition (Front-end EMR)**
When people aren't talking to Dragon Medical, they're talking about it

“We were looking for a scalable, enterprise-wide clinical documentation solution. Nuance not only met that criteria but also could provide a strong technology foundation to improve provider efficiency and enable timely documentation in the patient record.”
