Vocabularies.
Dragon® Medical Practice Edition contains medical vocabularies covering more than 90 medical specialties and subspecialties. It is important that you select the correct vocabulary. Using a specialized medical vocabulary that covers the cases you see in your medical practice will offer you the highest recognition and productivity gains. Selecting a non-medical vocabulary or the medical vocabulary of a different specialty can have a significant impact on your recognition accuracy.

Overview of the covered specialties and subspecialties.
General English: Non-medical vocabulary for dictating emails, letters, etc.
General Medical: A broad, non-specific medical vocabulary covering a wide range of medical specialties. Select this model if no other choice is applicable to you.

- Allergy and Immunology
