Real-time guidance to improve safety in the emergency department

Mitigate risk with content delivered exclusively through Dragon Medical Advisor.

ED Guidance for Dragon Medical Advisor, with emergency department content from The Sullivan Group, adds real-time clinical documentation advice with emergency department content from The Sullivan Group, adds real-time clinical documentation advice at a critical point in care and alleviates the administration burden on clinicians. Embedded risk and safety content within Dragon Medical Advisor supports diagnoses with relevant clinical information, minimizes rework from retrospective queries, measures and advances care quality and financial performance and supports the appropriate reimbursements for care.

ED Guidance brings AI-powered and workflow-integrated Computer-Assisted Physician Documentation (CAPD) to the point of care with diagnostic advice and clinical best practices that result in improved documentation. This reduces the occurrence of adverse safety events and the potential for missing diagnoses—the most common cause of ED-related malpractice litigation. In-workflow CAPD delivers:

- **Real-time risk and safety guidance** directly at the point of care.
- **Continuing Medical Education (CME) credits** through use of the risk and safety guidance offered through Dragon Medical Advisor.
- **Advanced analytics** to surface insights and pinpoint the most common risk categories, response and agree rates, speech recognition adoption, and more.

The Sullivan Group’s emergency medicine content, now available through ED Guidance for Dragon Medical Advisor, is used by more than 1,000 acute care facilities to drive greater alignment in clinical practice patterns to improve patient safety and deliver outcomes.
