Nuance patient engagement solutions combine decades of healthcare expertise with award-winning intelligent engagement technology trusted by 1,500 leading brands. A single platform based on proven AI brings world-class consumer engagement to healthcare. Organizations can advance the quality of service they deliver and solve pressing issues in patient engagement. Patients receive the information they need—on their terms—and healthcare organizations can:

— **Contain staffing costs.** Protect valuable live agent time with call deflection and automated patient communication. Interactive Voice Response (IVR) and virtual assistant capabilities provide support through a natural conversational dialog.

— **Protect ROI and revenue.** Limit revenue loss and advance patient retention when convenient communication and self-service capabilities boost satisfaction and promote patient appointment and care adherence.

— **Deliver intelligent engagement.** Build analogous experiences—no matter how patients get in touch—on a single integrated platform that powers informed interactions and conversational dialog.

— **Track performance.** Refine program performance by monitoring, assessing, and reacting to real-time analytics and service metrics.

**Nuance Patient Engagement Solutions**

Nuance Mix, a conversational AI tooling platform, gives organizations the control, flexibility, and freedom to build enterprise-grade, omni-channel patient engagement experiences. Our pre-built offerings will continue to expand to support a wide array of use cases across the patient journey and manage patient relationships, services, and care. Organizations can also tap into the core technology and create custom applications on their own or with help from Nuance.

---

**A single AI-powered platform for every patient engagement**

— **Proven omni-channel engagement technology** trusted by 85% of Fortune 100 companies best known for a great consumer experience.

— **The same conversational AI** that powers virtual assistant capabilities within leading EHRs enable natural interactions for patients.

**Nuance Patient Engagement Solutions**
Nuance Appointment Management
On average, 13% of patients are appointment no-shows. Patients who come to their appointments without the necessary preparations—fasting, completed lab tests, etc.—further impact patient care and organization revenue. Nuance Appointment Management uses real-time EHR integration to automate outreach using voice and SMS notifications and reminders. IVR technology automates delivery of helpful information to inbound appointment-related voice calls. A message-on-demand application sends messages using the patient's preferred method of contact.

Timely, helpful communication instills trust and protects patient safety. EHR SMS Gateway enables distribution of SMS messages directly from Epic—provide information to hospital staff, send patient status updates to family members, manage follow-up calls, and more.

Nuance Patient Support
Nuance Patient Support offers interactive bilingual 24/7/365 assistance powered by industry-leading natural language understanding. IVR and virtual assistant capabilities help patients self-serve account activation and password resets or receive automated answers to FAQs (general questions, COVID vaccine) over voice or chat, with the option to transfer to a live agent. Outbound support for telehealth appointments allows patients to confirm readiness. Patients needing assistance with telehealth appointments receive instructions and help with configuring, testing and troubleshooting applications and equipment, with the option to transfer to a live agent. Organizations share useful information that leads to greater patient portal and telehealth success.
