To make your job easier, we work harder on partnerships
Creating value for healthcare organizations through AI-powered solutions optimized for Epic.

Given all the platforms, devices, and unique demands of the people who use them, creating a seamless experience is not easy. That’s why we partner with Epic to make it easier for clinicians to document care without taking their focus off what matters most—their patients.

Deeply embedded across the continuum of care
Deep integrations between Nuance and Epic solutions allow physicians to engage with conversational user interfaces to practice medicine and create effective clinical documentation—while maximizing the value healthcare organizations receive from their EHR.

- **Nuance EHR Services** for optimization, training, go live, and service desk support delivered by 1,500+ leading experts in Epic and Nuance solutions with 10 years average experience
- Full **Dragon Medical One** support and embedded speech in Epic mobile apps for physicians and nurses
- **Dragon Medical Virtual Assistant** delivered through the Epic Voice Assistant for Haiku and Rover
- In-workflow documentation guidance through **Dragon Medical Advisor**, **Epic NoteReader CDI**, and **Epic NoteReader**
- Cloud-based CDI workflow management, documentation guidance, and encounter prioritization through **Nuance CDE One**
- **PowerConnect Actionable Findings** integrated into the Epic InBasket for critical test results
- **PowerShare Image Sharing** integrated into EpicCare and Epic MyChart

Joint innovation and strategic development
Technical strategy is the backbone of our partnership. That’s why we engage in joint development and innovation projects—and here are just a few of the areas where we work alongside Epic to deliver a seamless user experience:

- Ambient Clinical Intelligence and virtual assistants
- Speech recognition, NLP/NLU, and voice-enabling Epic
- Advanced radiology reporting and image sharing
- Call center operations and CRM

4 out of 5 facilities that use Epic use Nuance

Why Epic clients choose Nuance
- AI-powered solutions—including speech recognition, CAPD, CDI, and virtual assistants—for Epic
- Clinical approach and content backed by 25 years of expertise
- Proven technology portfolio uniquely combined with Epic expertise and knowledge
- EHR-enabling services with a proven track record of implementing and advancing clinician use of Epic
- Improved costs, better outcomes, and better overall experience
More than just a technology partner

Of course, Nuance is more than just technology. Organizations using Epic depend on Nuance EHR Services to help optimize the care team’s experience, leading to improvements in satisfaction, productivity, and patient care.

Our experienced team includes credentialed and certified professionals to help with optimization, training, go live, and professional staffing—but we don’t stop there. Our Clinical Service Desk and MyChart Service Desk teams are there to help support clinicians and patients, respectively, and ensure real-time support is available whenever it is needed.

Delivering unmatched outcomes for more than 350 Epic clients and counting—here are just a few examples:

– Among Nebraska Medicine physicians, 94% state that Nuance helps them do their jobs better, and 71% state that the quality of their documentation has improved.

– Massachusetts General Physicians Organization alleviates physician burnout and advances use of the EHR while achieving 83% Clinical Service Desk physician satisfaction and shortening issue resolution from days to minutes with the help of Nuance EHR Services.

– Rush University Medical Center physicians participating in Nuance-lead Epic optimization improved Epic proficiency scores by 44% and reduced documentation time per appointment by an average of 45%.

– TriHealth recognized a $12.8 million increase in appropriate reimbursement within 12 months and sustained financial impact over 13 years through Nuance CDI.

– UR Medicine Thompson Health proactively identifies and tracks patient follow-up recommendations with real-time updates and overdue alerts delivered through the EHR. With this integrated solution, the team increased recommended exam completion by 29%, reduced the risk of delayed diagnosis by 80%, and significantly improved follow-up communication and compliance.

– Vanderbilt University Medical Center (VUMC) used a virtual assistant delivered through the Epic Voice Assistant to reduce the time to submit a test order from 50 to 17 seconds and allowed clinicians to instantly retrieve prior health data during an examination.

– Scripps employed Nuance EHR services to optimize their use of Dragon Medical speech recognition integrated with Epic. Patient throughput improved by 1-2 additional consults per physician workday and ordering time across several specialty areas fell by 38%.

“The strategic development partnership between Epic and Nuance is extremely important to us because full integration—working seamlessly within the infrastructure of the native EHR—is the only way to get improved cost, better outcomes, and better experience, all in one package.”

Dr. John Lee
CMIO, Edward-Elmhurst Health
