

Mobile access for actionable findings acknowledgment and report viewing

PowerConnect Mobile Clinician enables medical providers with iOS and Android devices to receive, review, and acknowledge notifications from PowerConnect Actionable Findings. Additionally, with the optional PowerScribe Mobile Bridge, clinicians can also search and view radiology results and open orders from PowerScribe.

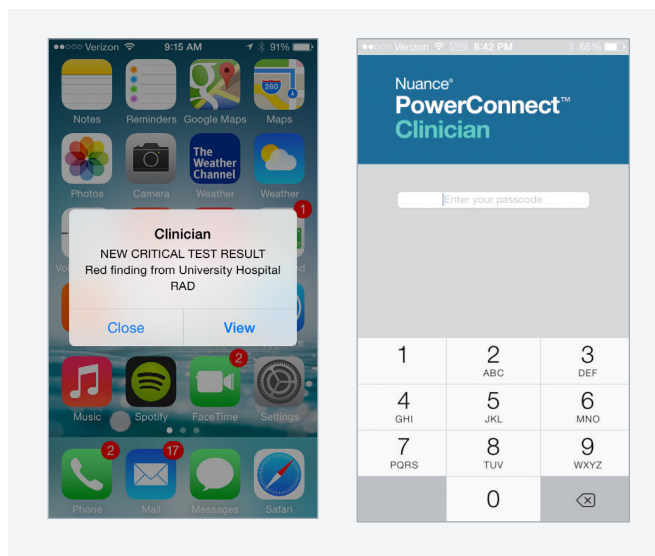

Actionable Findings

Receiving and accessing
PowerConnect Mobile Clinician allows providers to receive and respond to critical result and other actionable findings messages from radiologists or other diagnostic specialists.

Push notifications alert clinicians that a new message is ready for their review. Support for multiple accounts allows providers to view notifications from multiple institutions concurrently. Customizable security protects PHI before displaying the critical test result message.

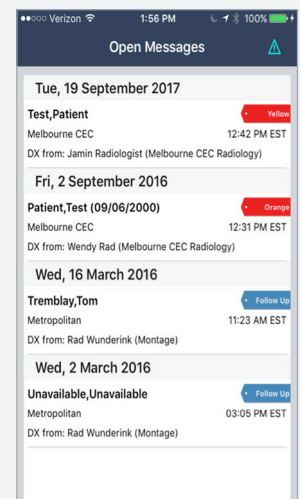

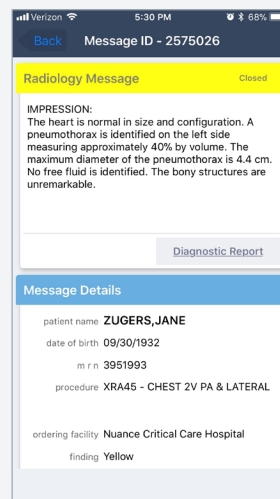

Reviewing and responding
The application allows ordering clinicians to easily view and respond to the actionable findings message. With the PowerScribe Mobile Bridge they can also see the full radiology report. The callback feature allows the clinician to quickly connect with the radiologist or diagnostic specialist to further discuss the message, if necessary.

Receiving and accessing

Reviewing and responding

With PowerScribe One or PowerScribe 360 Reporting v2.5 or later, the ordering physician can view the report's impression directly in the PowerScribe Mobile Clinician app. Otherwise, a button streams the radiologist's recorded voice clip.

Clinicians can simply touch Accept or Decline to respond to the actionable findings message and close the loop with diagnostic specialists. No longer will providers need to dial into traditional automated phone systems to close a message.

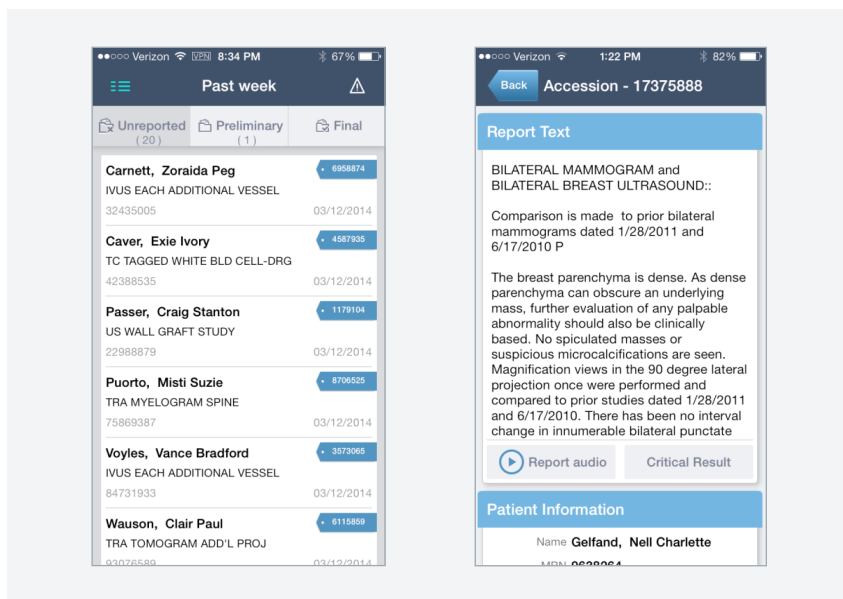

In addition to the open message queue, clinicians can view their closed message queue to identify what messages they acknowledged and better position themselves to take next steps in the patient care continuum.

Tools for secure password setup and maintenance right within the mobile app optimize usability and convenience.

Reports and orders

In conjunction with the PowerScribe Mobile Bridge, PowerConnect Mobile Clinician provides authorized users with secure access to Radiology orders and reports. Clinicians can receive push notifications when a new report is ready and view it from the convenience of their mobile device.

Reports and orders

Key benefits

- Enhances patient care by enabling faster review of diagnostic results with opportunity to call diagnostic specialists for further discussion.
- Provides secure access to search and view radiology results and open orders.
- Enables clinicians to receive, review, and acknowledge actionable findings communications from multiple institutions within a single application screen.

Requirements

- Viewing Reports and orders requires the PowerScribe Mobile Bridge and PowerScribe One or PowerScribe 360 Reporting v2.0 or later.
- Critical and actionable results functionality is available only for customers using PowerConnect Actionable Findings.

About Nuance Communications, Inc.
