Transform the radiology reading experience with PowerScribe One

AI-powered workflow reduces burnout, increases efficiency, and improves patient outcomes.

Completely re-designed from the ground up with users in mind, PowerScribe One delivers an unrivaled radiology reporting experience with a totally new user-centric design and color palette that reduces fatigue, saves clicks, and streamlines the desktop.

Harness AI and cloud technology to deliver value

PowerScribe One improves productivity and accuracy, addressing inefficiencies, inconsistent recommendations, and failed follow-ups. It harmonizes applications radiologists use every day, and automates workflows, so radiologists can focus on what matters most—the care teams and patients they serve.

— The power of structured data and conversational AI. Continuous learning and context-aware language understanding convert text into structured data to expand interoperability and enable data-driven applications. The new Ambient Mode and Virtual Assistant capabilities support voice-enabled workflow to turn free-form dictation into organized, structured reports and easily retrieve information.

— The power of AI-driven workflows. Language understanding and AI solutions are uniquely integrated into the workflow to improve efficiency and throughput, increase accuracy, and ensure consistency through evidence-based follow-up recommendations.

— The power of integration. Benefit from deep integrations through Nuance PowerCast, an extension of evolving FHIRcast standards. Synchronized integration between PowerScribe One and the disparate PACS, viewer and EMR systems radiologists use daily enables real-time, two-way data sharing. This allows integration with other third party systems and solutions available through the Nuance AI Marketplace.

— Anywhere, anytime reporting through cloud-hosted technology. Create voice-driven reports anywhere using your mobile device or remote workstation. Advanced language processing and speech recognition are hosted on Microsoft Azure, providing secure and reliable cloud infrastructure. Deployment is easier with a reduced IT footprint. Adoption is accelerated with no need for local profile training or maintenance.

KEY BENEFITS

— Improves provider satisfaction and combats burnout with a completely new interface and streamlined workflow.

— Increases productivity and accuracy by auto-populating reports, reducing errors, and minimizing redundancy.

— Ensures follow-up consistency with AI-driven, automated guidance, and quality checks.

— Enhances communication across the enterprise by intelligently sharing discrete data among systems, users, and platforms.

— Streamlines operations with easier deployment, more timely updates, and access to innovations through a secure, cloud-based environment.

— Supports remote deployment and anytime/anywhere reporting with the most adaptive and accurate speech technology in the industry.
Countless capabilities, all included and designed for you.

- **Heads Up Display**
  Translucent, floating window with key information moves out of the way to keep eyes on the images.

- **Cloud Speech**
  Hosted model provides unparalleled accuracy while eliminating local profiles and workstation deployments.

- **Clinical Guidance**
  Real-time decision support based on report context.

- **Quality Check**
  In-line detection and flagging of report inconsistencies and errors.

- **Smart Assist**
  Real-time checklist that summarizes potential quality and consistency issues.

- **AI Findings Navigator and Integrated AI**
  Integrated AI workflow through the Nuance AI Marketplace to augment and automate reporting.

- **EMR Follow-up**
  Automatic delivery of recommendations to the EHR and other systems.

- **Enhanced AutoTexts**
  Improved editor with a consolidated view that makes it easier to manage and use AutoTexts.

- **Relevant priors**
  Dynamic display of priors and relevant clinical content.

- **Peer Review**
  Automates systematic, randomized assessment of images and reports to support accreditation requirements.

- **Mobile Radiologist**
  Secure, voice-enabled mobile access for report viewing, editing, and signing on the go.

“PowerScribe One is delivering on its promise to improve our reporting experience. Our reports are better, and our radiologists are happier. There’s less repetitive and error-prone data entry, our content is more accurate and consistent, and our referring physicians and patients benefit as a result.”

— Terence Matalon, MD, FICR, FACR
Radiology Chairman
Einstein Healthcare Network

**Access the latest AI models directly in PowerScribe One.**

The Nuance AI Marketplace offers one-stop shopping and “try-before-you buy” convenience for AI models integrated directly into the radiology reporting workflow. A collaborative feedback channel helps to ensure superior results based on real-world use.
