Transform the reporting experience with PowerScribe One Essentials

Harness AI and cloud-driven technology to reduce burnout, increase efficiency, and improve outcomes.

Designed from the ground up with users in mind, PowerScribe One Essentials delivers an unrivaled reporting experience to radiology service providers performing fewer than 50,000 exams annually. This cloud-hosted, feature-rich platform offers an intuitive design with advanced speech recognition and workflow automation to achieve improved outcomes and provider satisfaction—at scale.

Harness AI and cloud technology to deliver value
PowerScribe One Essentials improves radiologist productivity and accuracy by automating reporting workflows and improving report quality so your radiologists can focus on what matters most—the care teams and patients they serve.

— **The power of structured data.** Continuous learning and context-aware language understanding convert text into structured data to expand interoperability and automate report creation.

— **The power of AI-driven workflows.** Advanced language understanding and AI solutions that deliver real-time clinical intelligence are uniquely integrated into workflows to improve efficiency and throughput, increase accuracy, and ensure consistency.

— **The power of the cloud.** Hosting through Microsoft Azure provides a secure and reliable cloud infrastructure with easy deployment and minimal IT footprint. The totally hosted platform requires just a single, on-premise edge device for HL7 integration purposes.

— **The power of advanced speech technology.** Voice-driven reports are possible from anywhere using your mobile device or remote workstation. Adoption accelerates with no need for local profile training or maintenance.

---

**KEY BENEFITS**

— Supports lower volume radiology providers with limited IT resources.

— Improves provider satisfaction and combats burnout with a user-friendly, modern interface and streamlined workflow.

— Increases productivity and accuracy by auto-populating reports, reducing errors, and minimizing redundancy.

— Ensures follow-up consistency with AI-driven, automated guidance and assisted diagnosis.

— Streamlines operations with easy deployment requiring fewer IT resources.

— Supports anytime/anywhere reporting with the most adaptive and accurate speech technology in the industry.
Countless capabilities, all included and designed for you.

Heads Up Display
Translucent, floating window with key information moves out of the way to keep eyes on the images.

Cloud Speech
Hosted model provides unparalleled accuracy while eliminating local profiles and workstation deployments.

Clinical Guidance
Real-time decision support based on report context.

Quality Check
In-line detection and flagging of report inconsistencies and errors.

Smart Assist
Real-time checklist that summarizes potential quality and consistency issues.

Integrated AI
Supports integrated AI workflow through the Nuance AI Marketplace to augment and automate reporting.

Enhanced AutoTexts
Improved editor with a consolidated view that makes it easier to manage and use AutoTexts.

Relevant priors
Dynamic display of priors and relevant clinical content.

Reduced IT
Fully hosted platform minimizes on-premise IT infrastructure and system maintenance burdens.

Peer Review*
Automates systematic, randomized assessment of images and reports to support accreditation requirements.

Peer Review*
Automates systematic, randomized assessment of images and reports to support accreditation requirements.

* Future functionality

“PowerScribe One is delivering on its promise to improve our reporting experience. Our reports are better, and our radiologists are happier. There’s less repetitive and error-prone data entry, our content is more accurate and consistent, and our referring physicians and patients benefit as a result.”
— Terence Matalon, MD, FICR, FACR
Radiology Chair
Einstein Healthcare Network

ACCESS THE LATEST AI SERVICES
The Nuance AI Marketplace offers one-stop shopping and “try-before-you buy” convenience for AI services integrated directly into the radiology reporting workflow. A collaborative feedback channel helps to ensure superior results based on real-world use.
