

# PowerScribe 360 Critical Results and PerfectServe Synchrony.

Manage critical test results to enhance radiology workflow and maximize compliance.

When a radiology exam reveals a critical finding, it's essential to get the right information to the right provider quickly. When you think about your current process, you may ask yourself several questions: Can you ensure the necessary processes are followed without adding extra steps to the radiologist's workflow? Can you make compliance easier and more consistent by optimizing existing infrastructure? And, because not everyone receives messages in the same way, are there ways for you to efficiently accommodate diverse communication needs and workflows?

The answer to all of these questions is yes. Nuance® PowerScribe® 360 Critical Results and PerfectServe® Synchrony™ integrate seamlessly, which means actionable findings are easily captured and sent according to the ordering clinician's communication preferences. The powerful, integrated solution combines PerfectServe's Dynamic Intelligent Routing™ capabilities with the robust notification protocols of PowerScribe 360 Critical Results. Together, these technologies ensure messages are routed quickly to the correct providers, so they can then communicate with their patients.

## Dynamic message targeting with flexible options

The intelligent routing technology from PerfectServe accounts for ordering clinicians' schedules and availability. When radiologists send critical results messages from PowerScribe 360 Critical Results, intelligent routing accounts for provider on-call schedules, attending, resident and clinical team after-hours preferences, and more, to deliver the right notifications to the right providers on their secure device.

Managing the notification preferences of a diverse clinician population can be both complex and challenging, but the integration of PowerScribe 360 and PerfectServe streamlines this process. The flexibility of the PowerScribe 360 solution allows for a hybrid workflow; if some clinicians are not enrolled and profiled in PerfectServe, they will receive their messages through the standard Critical Results process.

---

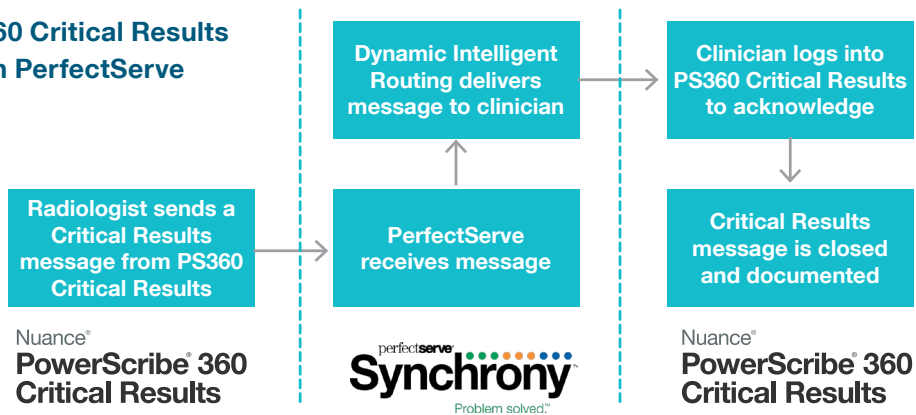

## Key features

- Integration of the powerful technologies of two leading healthcare technology partners
- Dynamic accommodation of provider schedules and availability
- Expedited workflows
- Advanced message routing
- 24x7 monitoring

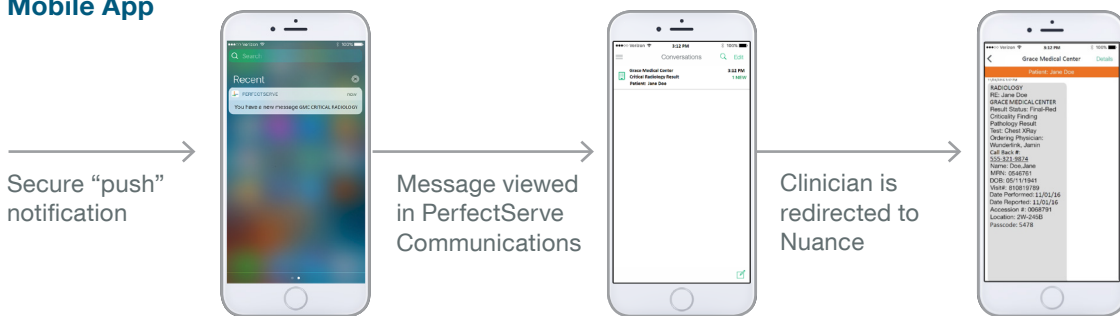

## Key benefits

- Streamlines provider workflows and optimizes existing communications infrastructure
  - Routes actionable findings to the responsible clinician, accurately and efficiently
  - Enhances patient safety and reduces risk of sentinel events while satisfying both radiologists and ordering clinicians
  - Maximizes compliance efforts
  - Accommodates a diverse clinician population, allowing PowerScribe 360 Critical Results to reach providers not enrolled in PerfectServe
