VERA analysis made easy.

Uncover potential lost VERA funding.

**Challenge**
How can I ensure that my VA organization receives equitable funding for the healthcare services we provide?

**Solutions**
Clintegrity® 360 VERA Analyzer will help you target inpatient admissions that may need coding revisions or clinical documentation improvements to ensure a patient is assigned to the appropriate VERA patient class and price group. Identifying these cases and making coding changes could potentially improve your facility’s ability to capture full VERA funding.

**Features and highlights.**
- **VERA Audit Detail report**
  The VERA Audit detail report automates the audit process for 20+ inpatient categories, reducing time to determine if coding changes should be made or if queries should be sent.

- **VERA patient class and price group data**
  Patient class and price group data is readily accessible and viewable for each patient within the product. There is no need to do a lookup in another application.

- **Full VERA funding support**
  Clintegrity 360 VERA Analyzer enhances coding precision so the appropriate VERA patient class is assigned to capture full funding for patients.

- **Clinical documentation improvement enhancements**
  Clintegrity 360 VERA Analyzer contributes to clinical documentation improvement efforts by suggesting when queries should be considered.

- **VERA Audit Impact report**
  The VERA Audit Impact report helps to determine easily if coding changes can improve VERA funding over time.

- **Accurate and immediate data updates**
  VERA data can be refreshed and available immediately, giving you the most up to date VERA class information needed to flag cases for review accurately.

**Key benefits**
- Saves time identifying potential coding changes.
- Assesses patient class and price group data quickly and easily.
- Supports full VERA funding.
- Enhances clinical documentation improvement efforts.
- Monitors coding’s impact on VERA funding over time.
- Identifies cases for review accurately.

**Proven audit strategy.**
The Clintegrity 360 VERA Analyzer audit engine is based on reliable, knowledge-based criteria proven through extensive Nuance VERA Optimization engagements throughout the VA. Using Nuance’s VERA Optimization Service in conjunction with Clintegrity 360 VERA Analyzer can kick-start and improve both your inpatient and outpatient VERA audit and education strategy.
Clintegrity 360 | VERA Analyzer enables facilities to target the top 22 inpatient audit areas for coding reviews quickly and easily. When combined with VERA Optimization Service, additional inpatient and outpatient areas are audited to help identify further opportunities for appropriate funding.

Since 2010, our VERA Optimization Service has already helped over 20 VA facilities identify an average of $575K in potential lost annual revenue. Using Clintegrity 360 | VERA Analyzer, you will be able to monitor your opportunities easily, so you can sustain improvements made in coding and clinical documentation. Let us help you ensure your organization receives equitable and accurate funding.
