**Microsoft**

Capture the complete patient story naturally and efficiently

Next-level speech-driven clinical documentation with secure, convenient, and comprehensive support from pre-charting through post encounter

Not all speech recognition is created equal

Dragon® Medical One, the industry's #1 rated conversational AI workflow assistant and documentation companion, complements ambient documentation and supports a broader range of clinical and administrative workflows through hundreds of features and advanced capabilities.

- **Off-the-charts accuracy.** Sophisticated speech capabilities allow you to dictate high-quality notes. Achieve superior accuracy, including automatic accent detection and audio calibration, with no voice profile training.

- **Dictation done better.** Advanced speech with natural language commands promotes a hands-free, efficient approach to documenting care before, during, or after the patient visit. Clinicians decide how and where documentation gets done—from dictating at the cursor to using an integrated dictation box, as well as modern browser support.

- **Personalized productivity boosters.** Streamline documentation by creating and sharing shortcuts, AutoTexts, voice commands, and custom vocabularies across individuals, departments, and organizations.

- **Auto-punctuation.** Save time with speech recognition intuitive enough to finish your sentences—and punctuate them correctly.

- **Extra mobility.** When paired with PowerMic™ Mobile, any workstation becomes a dictation station, giving clinicians freedom to document notes using their smartphone as a secure wireless microphone.

- **Consistent voice experience.** Easily manage licenses, deployments, and default settings to ensure an efficient, familiar, and predictable experience across care settings, devices, and apps.

- **Industry-leading architecture.** With remarkable responsiveness and resiliency, this HITRUST CSF-certified solution enables broad integration and seamless support for both browser and web-based EHRs—giving you the flexibility you need in the environment you want.

Dragon named #1 Best in KLAS for Speech Recognition: Front-End EMR for 5 consecutive years

Delivering better productivity, efficiency, and quality

92% of customers agree that Dragon Medical One makes their clinicians more efficient.

92% of customers would recommend Dragon Medical One to a colleague

More than half of customers agree that Dragon Medical One makes their day easier and brings joy back into their practice

*Based on Dragon Medical One customer survey conducted by Product Marketing Team (n=170 unique responses); 12-2024.

Ease access for an enriched workflow experience
Using integrated voice skills, Dragon Medical One alleviates the administrative burden on clinicians. By reducing repetitive tasks and easing information access, clinicians can spend less time on documentation—and more time with patients.

Order a chest X-ray	Set reminder to order a lipid panel in 3 months	Go to HPI	Send message to Dr. Jones
What's the latest CBC?	Search UpToDate for lisinopril dosage guidelines		
		Calculate the creatinine clearance on MDCalc	

Custom skills
Create your own voice experience by automating tasks such as chart navigation, orders, and signing notes. Go beyond clinical workflows to draft personal emails, navigate Microsoft Office documents, and search the web.

Advanced skills
With built-in access to third-party apps, use your voice to seamlessly search for clinical content through applications like UpToDate or access medical reference data with MDCalc.

Premium skills
Extend the reach of your investment with EHR-specific voice skills designed to enhance capabilities and drive even more efficiency.

"Dragon has literally made me a better father. The amount of free time I now have on the weekends to spend with my children is priceless. Before Dragon, I would spend anywhere from three to six hours on a Sunday, reviewing, editing, and signing numerous charts that took away family time. Dragon changed that for me, and I am grateful."

— Dr. Michael Greene
Peachtree Spine Physicians

Boost efficiency and improve performance
Use self-service analytics and peer benchmarking to track and monitor KPI trends while maximizing individual and group-level performance with actionable intelligence. Identify opportunities for ongoing improvement and measure performance against hundreds of thousands of users across more than 6,500 healthcare organizations.

Achieve more with Dragon as your AI copilot
Dragon solutions offer flexible and efficient new ways to document care to promote better work-life balance for caregivers and a better experience for patients.
