45% of cardiovascular reports contain coding errors that lead to...

- Hundreds of cases per year that pose a compliance risk for the average sized hospital
- $8K average missed reimbursement per under-coded case
- $180 average under-reimbursement per case (Medicare payment level)

Why hospitals struggle with accurate billing

- Complex procedures
- Coding rule complexity
- Documentation variation

Introducing a better way to document and code

- Simplifies documentation
- Saves time
- Supports compliant reimbursement

Nuance Cardiovascular CAPD

- Structured Documentation: All physicians document in same way
- Code Engine: Auto-codes according to the latest guidelines
- Compliance Center: Coders can ensure physician documentation and codes immediately

The Results

100% accurate coding and reimbursement

- Accelerates the catheterization lab revenue cycle by a day or more
