

SAVE TIME, SPACE, **PAPER** AND MONEY

Clintegrity 360 | eSignature

Efficient Authentication of Paperless
Patient Records

CHALLENGE:

How can my healthcare organization efficiently review documentation deficiencies and electronically access, edit and sign documents?

SOLUTION:

Clintegrity 360™ | eSignature, a Nuance® Healthcare solution, gives you the ability to review and electronically authenticate documents from any workstation, saving you time, space, paper and money. With Clintegrity 360 | eSignature, healthcare professionals can view a list of all their documentation deficiencies and access, edit and sign documents from workstations in any department or facility within your organization or even from their homes.

Tight integration with Clintegrity 360 | Chart Completion and Clintegrity 360 | Electronic Document Management (EDM) reduces chart analysis time via automatic creation and updates to deficiencies.

ONE PLATFORM, ONE SOLUTION

Clintegrity 360 | eSignature is tightly integrated with other Clintegrity 360 HIM modules to seamlessly share patient and encounter data. Data is interfaced or entered once for multiple uses. It also has the same look and feel as other Clintegrity 360 modules, reducing staff training time and ensuring easy navigation between multiple modules.

KEY BENEFITS

- Reduces medical record completion time
- Reduces paperwork
- Improves access to patient information
- Streamlines the deficiency analysis process

INCREASED ACCESSIBILITY

With its web-native technology, Clintegrity 360 | eSignature gives you easy and flexible access to electronic patient medical record information anytime, anywhere.

MORE EFFICIENCY

Clintegrity 360 | eSignature facilitates greater efficiency and reduced costs. Its tight integration with Chart Completion reduces chart analysis, reanalysis and record completion time. It does this by automatically creating and updating deficiencies as documents are transcribed and electronically signed. It also reduces the number of reports that need to be manually retrieved and distributed.

GREATER FLEXIBILITY

Clintegrity 360 | eSignature is able to receive unsigned documents from many different systems, including Transcription, Computerized Physician Order Entry (CPOE), Electronic Medical Record, Electronic Document Management (imaging), Lab, Radiology and other health information systems. Signed documents and their status can be easily exported to an EMR or clinical data repository.

SMARTER FEATURES

- Electronic documentation authentication
- Allows for easy editing of documents prior to authentication
- Supports multiple sequential and nonsequential electronic signatures per document
- Enables documents to be viewed, faxed or emailed
- Easy-to-learn, intuitive provider user interface
- Provider access to their incomplete-chart list with the ability to view all deficiencies
- Permission-based provider group signing
- Tracks user activity with built-in audit trails
- Stores all versions of documents
- Standard and ad hoc reporting capability

ABOUT NUANCE HEALTHCARE

Nuance Healthcare, a division of Nuance Communications, is the market leader in creating clinical understanding solutions that drive smart, efficient decisions across healthcare. As the largest clinical documentation provider in the U.S., Nuance provides solutions and services that improve the entire clinical documentation process—from capture of the complete patient record to clinical documentation improvement, coding, compliance and appropriate reimbursement. More than 450,000 physicians and 10,000 healthcare facilities worldwide leverage Nuance's award-winning voice-enabled clinical documentation and analytics solutions to support the physician in any clinical workflow on any device.
