

# Secure and automated government case file scanning.

The U.S. Department of Justice (DOJ) Office of the Chief Information Officer (OCIO) defines a requirement for the ability to gather, analyze, and share intelligence information as part of mission driven information technology objectives outlined in the Department of Justice IT Strategic Plan 2010-2015.

In support of the DOJ's mission, Nuance AutoStore® enables secure and automated scanning of litigation documentation directly into most government Commercial Off-the-Shelf (COTS) case management systems deployed throughout DOJ agencies. AutoStore's front end capabilities for networked multifunction devices (MFDs) enable authorized Personal Identification Authorization (PIV) users to scan and index case records quickly and efficiently.

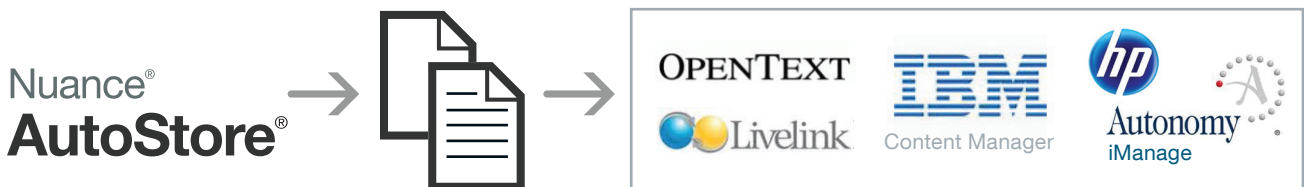

## About AutoStore

AutoStore is a mature COTS enterprise content capture application that manages the capture and secure delivery of paper and electronic documents into business applications. AutoStore is deployed throughout the U.S. federal government including many implementations with DOJ.

To learn more about Nuance AutoStore, please call 1-800-327-0183 or visit [nuance.com](http://nuance.com)

## Key benefits

- Streamlines the distributed capture and processing of DOJ case files and supporting documentation.
- Automatic high-throughput OCR creates fully indexed text-searchable digital case files.
- Provides a centralized audit trail of all scanned documents.
- Allows batch processing with barcode recognition technology.
- Allows indexing and metadata tagging of individual documents.
- Provides additional security and integrity measures including PII sensitive content filters, full document audit trails, and conversion to PDF/A.
- Features centralized solution deployment and process control.

Government Commercial Off-the-shelf (COTS) case management system
