

The MFP Scanning and OCR kiosk for convenient indexing, accessibility, and strong security applications

Challenge

In many organizations, critical requirements—for higher security, enhanced accessibility, faster data entry, or even compatibility with more diverse fleets of copiers—call for an enhanced way to deploy scanning and OCR solutions that start with scanning processes at shared scanners and copiers.

Solution

That's where eCopy ScanStation comes in. Powered by eCopy ShareScan Suite software, eCopy ScanStation is the secure kiosk for network scanning applications that demand high security, enhanced accessibility, faster index-data entry, or connectivity to copiers, MFPs,

and scanners that don't support embedded scanning and OCR solutions.

The ergonomically designed ScanStation extends the power of eCopy ShareScan Suite for these demanding applications by providing a full keyboard, mouse, and 15-inch color touch screen. Users can initiate workflows, preview/validate scanned images, and enter indexing and metadata—right at the scanner or copier. In particular, ScanStation is ideal for federal offices that must extend HSPD 12 compliance to multifunction copiers and scanners via Common Access Card (CAC) strong security measures.

With a full keyboard, mouse, and touch screen, eCopy ScanStation makes it easier than ever to scan, convert, share, and distribute paper documents—right from the copier or scanner.

Key features and benefits

- **Ergonomic kiosk for easier accessibility**—Use a full-sized, vertically adjustable hardware keyboard, mouse, and 15-inch LCD touch screen with sliding platform.
- **Support for federal HSPD 12 compliant common Access Card Readers**—eCopy ScanStation is the ideal solution for federal and DoD agencies that must extend HSPD 12 compliance to multi-function copiers and scanners via Common Access Card (CAC) strong security measures.
- **Scanning and indexing with Rapid Data Entry**—When you need manual indexing and classification of scanned documents, eCopy ScanStation lets you quickly enter index metadata values and visually confirm document previews to ensure all critical elements (such as a signature field, seal, or identifying marks) have been scanned completely.
- **eCopy-Enablement for non-eCopy-ready devices** — Leveraging industry-standard ISIS and TWAIN scanning interfaces, eCopy ScanStation supports a wide range of copiers and scanning peripherals with eCopy ShareScan's award-winning network scanning, OCR, and intuitive touch screen capabilities.

eCopy ShareScan Suite securely puts paper-based data directly into electronic workflows. Starting right at the copier, you can scan, extract, classify, index and convert paper information into digital information that flows effortlessly into and through the electronic channels of your business.

System requirements

MFP and Scanners supported by eCopy ScanStation
