

# Nuance provides healthcare enterprise for centralized output management.

Healthcare enterprises have to contend with numerous applications running on various operating systems with a complex web of print drivers, spoolers, management tools and queues scattered across numerous print servers with no centralized visibility or control.

### Solution and how it works.

Output Manager (OM) provides for the centralized control and management of the healthcare enterprise print environment creating a centralized way to manage, control

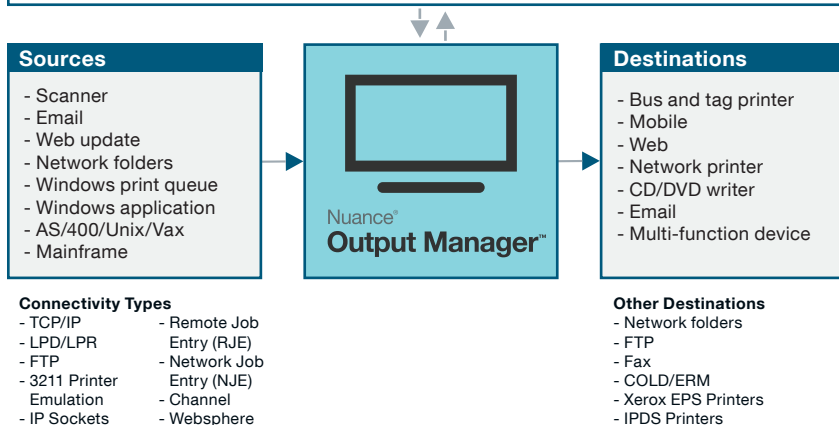

and troubleshoot issues while ensuring high levels of reliability and availability.

Hospital print administrators use (OM) to centrally monitor all sources, documents, document management activities, and destinations. The intuitive user interface provides a complete and current picture of everything that occurs in a company's output processes, facilitating smooth, scalable and reliable printing Infrastructure with a single point of control.

### Key benefits

- One centralized enterprise output manager system.
- Exceed SLAs with centralized troubleshooting of print.
- Cost savings with centralized visibility and control.
- Driverless printing—Nuance postscript universal driver.
- Higher end-user satisfaction through higher availability.
- Proactively discover print related issues before users do.
- Maintain HIPAA Security Compliance.
- Secure authenticated release print from the EHR.
- Improve print results by modifying document contents.
- Reduce cost through transformation of file formats.
- Eliminate the need to print, route documents thru AutoStore.

Process
