

3 IT Budget Breakthroughs with PDF Software

Hidden PDF software costs can eat away at your bottom line if you're not using the right product.

PDF software can benefit your budget.

Here are 3 ways how.

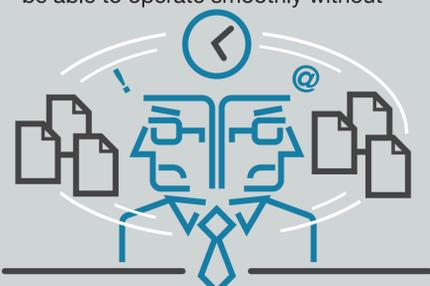

1 STOP WORKAROUNDS & EXTRA SOFTWARE SUPPORT

IT teams waste a lot of time running around supporting workarounds.

Managing more PDF products and licenses than necessary increases IT support overhead.

Too many IT hours are wasted supporting PDF software that should be able to operate smoothly without

intervention.

IT professionals want to innovate —not chase software problems.

Your PDF software should actually lower your IT support costs.

With single license PDF software, IT staff can do what they do best instead of spending hours managing PDF software.

- ✔ Give IT staff time to innovate
- ✔ Make IT and user teams more productive and less frustrated

2 STREAMLINE & SIMPLIFY ASSET MANAGEMENT

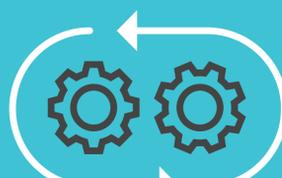

Instead of making it smoother, your PDF software adds chaos to asset management.

Many organizations use PDF software that requires upgrades and patches for multiple products, without having enough licenses for all users bringing management and potential audit

Stop struggling to streamline asset management because both approved and unauthorized—are simply too much to manage.

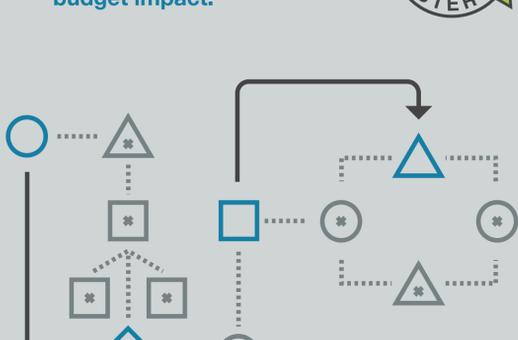

Using single-license PDF software means more users get the features they need without workarounds.

And, it helps streamline processes to increase productivity, lock down asset security and make managing assets easier.

- ✔ Streamline & simplify asset management
- ✔ Reduce IT support

3 REDUCE OVERHEAD & RETAIN STAFF

PDF software should simplify processes, which can have a huge budget impact.

To keep IT resources, it's crucial to remove unnecessary products to reduce overhead. Keeping dollars means retaining or even adding IT resources.

A single-license PDF product means more users for the same—or fewer—dollars.

Some providers have eliminated software audits that are often part of the contract renewal process.

This helps to stop unexpected budget erosion that could lead to the loss of resources—including human resources.

- ✔ Deploy PDF software to more users for the same price
- ✔ Eliminate licensing audits and non-compliance fines

Are you letting PDF software kill your budget when it could be saving you budget dollars?

These days, you have more than one best-in-class choice when it comes to PDF software. Nuance® Power PDF™ Advanced is designed with savings, security and simplicity in mind.
