

# Enable Next Generation Product Development With Integrated Document Workflows

## Product Development Has Become A Data Driven Process From Initial Concept To Product Launch

### CONCEPT:

- Product Concept Documents
- Patent Info
- Market Research

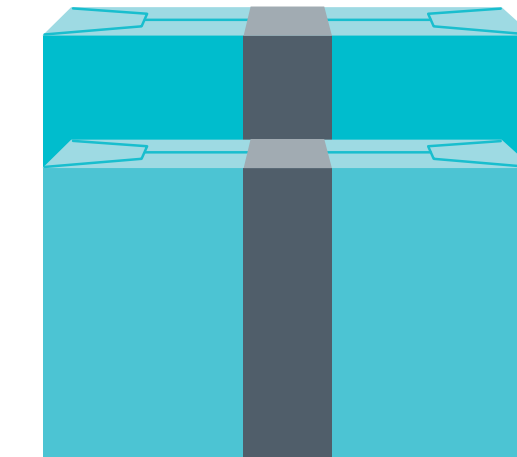

### DESIGN & DEVELOP:

- Engineering Documents
- Product Definition
- Market Requirements

### PROTOTYPE & PILOT:

- Technical Specifications
- Product Testing Reports
- Product Requirements documents

### LAUNCH:

- Product Launch Plan
- User Manuals
- Technical Manuals
- Sell Sheets
- Product Information

Shortening time-to-market is critical to operational efficiency and market competitiveness.

## Too Often, Documentation Bottlenecks Slow Things Down

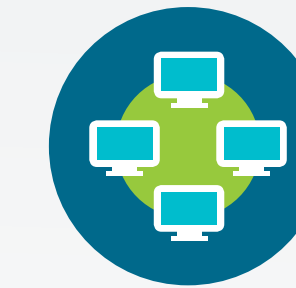

Knowledge workers spend **26%** of their time searching for and consolidating information<sup>1</sup>

**44%** of the time knowledge workers fail to find information they seek<sup>2</sup>

**43%** of manufactures have little or no visibility into their supply chain<sup>3</sup>

**61%** of knowledge workers access 4 or more systems to find information they need<sup>4</sup>

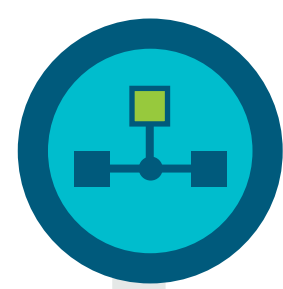

**34%** of companies have had sensitive information compromised due to poor file management practices<sup>5</sup>

## Eliminate Bottlenecks By Streamlining Product Development Workflows

Seamless integration with multiple back-end systems

Centralized control of multiple information silos

End-to-end mobility for quick access from any place, on any device

Automate document capture and distribution throughout product development workflow

Single System to capture, organize, publish and distribute documents

Digitize paper documents to streamline workflow

Minimize manual processing, routing, and approving of documents

Increase security with access controls, end-to-end encryption, and audit trails

**85%** of manufacturing leaders are increasing their investment in operational excellence<sup>6</sup>

Workers with access to document management systems are **3X more** likely to work from mobile devices<sup>7</sup>

Manufactures can achieve greater security AND **15%** cost savings with Follow-You Printing<sup>8</sup>
