

Public spending on health care as a percentage of GDP 2016 to 2070

Source: EC and EPC (2018)

Public spending on long-term care, as a percentage of GDP 2016 to 2070

Growing proportion of elderly people and people with one or more chronic diseases

Rising patient numbers and increasing administration and documentation efforts lead to time pressure and physician dissatisfaction

Empower care teams with the ability to use their voice to document rather than typing

Speech recognition powered by AI saves care teams' time spent on documenting

“One & done”

Clinical data captured in the EHR with speech recognition cutting-edge technology for the entire care journey is shared instantly to save lives and increase the quality by enabling patient-centric pathways

Deep-learning, Cloud-based infrastructure, AI powered solution

Dragon Medical One

Reliable and mobile

Encrypts and transmits patient health information (PHI) over secured HTTPS connection

Securely converts clinicians' speech into structured notes

Increase clinical data speed and operational efficiency – anytime, anywhere – with Dragon Medical One.

High-quality clinical documentation at the point of care, time saving, more time with patients!
