

Spend less time on documentation, capture the complete patient story, and ensure care quality with Dragon Medical One.

Powered by Artificial Intelligence, neural networks and deep learning, Dragon Medical One is a cloud-based speech platform for clinicians and care teams to securely document complete patient care in the EHR.

Always available, designed for speed, accuracy, and flexibility, with personalised vocabularies and templates that can be accessed and shared across a wide range of devices, regardless of physical location.

Dragon Medical One allows clinicians and care teams to:

- access speech anywhere via the cloud
- reduce the time documenting
- improve the quality of the document
- have structured templates to support completion

Why choose Dragon Medical One Speech recognition in the Cloud?

- State-of-the-art technology result of three decades of clinical expertise. Powered by Artificial Intelligence, helping clinicians and care teams in their daily tasks.
 - Secure solution, easy to use, accurate, speed and highly available.
 - When paired with PowerMic Mobile, clinicians have the freedom to dictate from virtually anywhere.
-

Mobility. Clinicians can complete their patient notes-anytime, anywhere by using their personal smartphones as a dictation microphone, to limit the spread of resistant microorganisms and reduce the risk of resistant bacteria spreading. All within any Windows-based device using the flexibility of a mobile app.

PowerMic Mobile, a robust and secure mobile microphone app for iOS and Android is centrally managed with full Mobile device management support. It can be used with any thin or zero client infrastructure. No passwords to remember, authenticates based on Dragon Medical One login.

Security. Dragon Medical One provides a consistent experience at the hospital, clinic, office, and home—all backed by a secure infrastructure with easier installation and maintenance.

Microsoft Azure, the hosting infrastructure—ISO 27001 certified and **GDPR-compliant** is highly available, 24x7x365, with uptime guarantees of at least 99.9%. All communication between client applications and Dragon Medical Cloud Services is transmitted via HTTPS with an AES 256-bit cipher algorithm.

Installation and Maintenance. Easy to install, easy to maintain and built with virtualisation in mind.

Cloud-based with no on-site servers or complex configurations, Dragon Medical One provides automatic updates, less work for IT staff, and less hassle for clinicians—care teams can start dictating in less than 5 minutes.

Accuracy. No voice profile training required, accent detection, and automatic microphone calibration.

Single, cloud-based voice profile offers a consistent speech recognition experience across devices and platforms. With the COVID-19 auto texts, clinicians can select, apply and quickly complete the patient's narrative.
