DATASHEET

Dragon NaturallySpeaking 10 Standard

Turn Talk into Text

With Dragon® NaturallySpeaking® 10 Standard, a user can talk to the computer and watch the spoken words instantly appear in documents, email and instant messages.

Users can even surf the Web just by speaking. Dragon NaturallySpeaking 10 turns voice into text three times faster than typing, and it delivers up to 99% accuracy. It learns to recognize the user's voice instantly, and continually improves the more it's used.

Speech recognition software products like Dragon use the human voice as the main interface between the user and the computer. Millions of users turn to Dragon each day to make PC interaction easier, faster and more fun. Users can dictate and edit in virtually any Windows application, including Microsoft Word, Internet Explorer, Mozilla Firefox and AOL. This revolutionary and easy-to-use product gives users everything they need to get started, including a high-quality headset.

ACCURATE SPEECH RECOGNITION FOR PC APPLICATIONS

Dragon NaturallySpeaking 10 Standard offers unprecedented speech recognition with unrivaled accuracy levels: it's up to 20% more accurate than Version 9, with up to 50% more accurate results than the product delivered just five years ago. Users gain the added benefit of avoiding spelling errors and typing mistakes. In fact, the product actually learns from corrections over time.

WORKS WITH THE APPLICATIONS USERS ALREADY HAVE

Dictate directly into Microsoft® Word™ and most other Microsoft Office applications running on Microsoft Windows® XP, Windows 2000, and Windows Vista™. Dragon also supports popular programs such as Corel® WordPerfect®, Microsoft Internet Explorer®, Mozilla® Firefox®, and AOL®. Navigate the desktop by voice: launch or switch applications, save or print documents, and more – even control menus and dialog boxes.

CREATE AND EDIT DOCUMENTS AND MESSAGES

NEW Dragon NaturallySpeaking 10 introduces new graphical icons to enhance the DragonBar user interface, making the product even easier to use.

Users can quickly add custom words, such as proper names, to the system's vocabulary.

NEW Quick Voice Formatting commands allow users to issue a single voice command, such as "Bold *Quick Voice Formatting*" to make deleting and formatting text faster than ever. In addition, unique Natural Language Commands mean users don't have to memorize complex instructions. In Word, for example, a user can say, "make that bigger," and the font size increases instantly.

With the automatic punctuation option, users can omit spoken periods and commas during dictation – Dragon NaturallySpeaking enters them automatically.

SEND EMAIL, INSTANT MESSAGES AND SURF THE WEB – ALL BY VOICE

Users can browse the Internet with ease: search the Web, access information and navigate Web pages, simply by speaking URLs and links.

USER BENEFITS

Faster than Typing

Most people speak more than 120 per minute but type less than 40 words a minute. That means users can create documents and email messages more than three times faster using Dragon NaturallySpeaking 10 Standard. The software never makes a spelling mistake, and it actually gets smarter the more it's used.

Fun and Easy to Use – Get Started Right Away

Dragon NaturallySpeaking installs quickly and requires no special script reading. New on-screen help and tutorials help users become experts in no time. Users can dictate letters and emails instantly! A comfortable, high-quality headset is included.

Avoid Repetitive Strain Injuries

By using voice to control the PC and create documents, users reduce their risk of developing repetitive strain injuries, such as carpal tunnel syndrome.

SYSTEM REQUIREMENTS

- CPU: Intel® Pentium4® or later or AMD Athlon 64 1 GHz or later (SSE2 instruction set required)
- Memory: 512 MB RAM (1 GB RAM for Windows Vista™)
- Free hard disk space: 1 GB (2 GB for localized non-English versions)
- L2 Cache: 512 KB
- Supported Operating Systems: Windows Server 2000; Windows Server 2003; Windows XP SP2 or higher, 32 bit; Windows 2000 SP4 or higher; Windows Vista™ or Windows Vista™ SP1, 32-bit or 64-bit
- DVD-ROM drive (required for installation)
- Microsoft® Internet Explorer 6 or higher (free download available at www.microsoft.com)
- Nuance-approved noise-canceling headset microphone (included), Creative® Labs Sound Blaster® 16 or equivalent sound card supporting 16-bit recording
- For details on Bluetooth microphones, Tablet PCs and other hardware, please visit <http://support.nuance.com/compatibility/>
- A Web connection is required for activation

During the install process the software checks to make sure your system meets these requirements; if the requirements are not met, the software will not be installed.

*** This edition of Dragon does not support dictation directly into Electronic Medical Record (EMR) Systems. For EMR support, please use Dragon Medical Edition.**

RECOMMENDED SPECIFICATIONS

- CPU: Intel® Pentium4® / 2.4 GHz (1.6 GHz dual core) or equivalent AMD processor (SSE2 instruction set required)
- Memory: 1 GB RAM
- L2 Cache: 1 MB
